

AL-AMEEN ENGINEERING COLLEGE

(AUTONOMOUS)

Accredited by NAAC with "A" Grade :: An ISO Certified Institution (Affiliated to Anna University, Chennai & Approved by AICTE, New Delhi) Karundevanpalayam, NanjaiUthukkuli Post, Erode – 638 104, Tamilnadu, INDIA.

CURRICULUM & SYLLABI

SEMESTERS – I to VIII (Regulations 2020)

CHOICE BASED CREDIT SYSTEM

B.E. Computer Science and Engineering

Applicable to the Students from the AY 2021-22 onwards

KNOWLEDGE LEVELS (BLOOM'S TAXONOMY)

| Notation | Knowledge Levels |
|----------|------------------|
| K1 | Remembering |
| K2 | Understanding |
| К3 | Applying |
| K4 | Analysing |
| K5 | Evaluating |
| K6 | Creating |

INSTITUTION VISION

To be a multi-disciplinary institute of academic excellence in Engineering, Technology and allied fields for uplifting the under-privileged and rural; inculcating brotherhood and positivism among its students.

INSTITUTION MISSION

To groom confident, wholesome students with social consciousness and values, by endeavoring experiences for the ever-changing world of work.

DEPARTMENT VISION

To be a renowned program for satisfying the rapidly changing information and communication technology needs of the rural and underprivileged with humane values.

| DEPA | RTMENT MISSION |
|------|--|
| M1 | To grow comprehensive ICT experiences in students for uplifting rural and the under- |
| M1 | privileged community. |
| 142 | To impart Computer Science education towards inclusiveness of trans-disciplinary |
| M2 | areas in the ever-changing ICT environment. |
| 1.42 | To develop students focused on careers and entrepreneurship with awareness of |
| M3 | social, economic and ethical impacts. |

| PROGRAMME EDUCATIONAL OBJECTIVES (PEOs) | | | | | | | | |
|---|---|--|--|--|--|--|--|--|
| PEO 1 | Graduates will be prepared with an ethical work culture for taking ICT to the rural and the under-privileged. | | | | | | | |
| PEO 2 | Graduates will be employed in the computing profession, and will understand, research, apply new ideas and technologies of ICT as the field evolves. | | | | | | | |
| PEO 3 | Graduates will be equipped with communication skills and leadership qualities, with an interest in, and aptitude for starting-up and growing their own new firms. | | | | | | | |
| PEO 4 | Graduates will demonstrate their ability to work effectively as a team member in an ever-changing professional environment. | | | | | | | |

| | PROGRAM OUTCOMES (POs) |
|-------|---|
| PO 1 | Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. |
| PO 2 | Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. |
| PO 3 | Design/Development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. |
| PO 4 | Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. |
| PO 5 | Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations. |
| PO 6 | The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. |
| PO 7 | Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. |
| PO 8 | Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. |
| PO 9 | Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. |
| PO 10 | Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO 11 | Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. |

PO 12 Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

| | PROGRAM SPECIFIC OUTCOMES (PSOs) |
|-------|---|
| PSO 1 | Organize heterogeneous data for accurate large-scale data processing using appropriate algorithms and tools. |
| PSO 2 | Understand modern networking technologies and apply programming skills to create scalable real-time applications. |

CURRICULUM

| | COURSE LEARNING OUTCOMES (COs) | | | | | | | | | |
|-----|--|----|---|--|--|--|--|--|--|--|
| | After Successful completion of the course, the students should be able to | | | | | | | | | |
| CO1 | Identify Eigen values and Eigenvectors and apply orthogonal diagonalization to convert quadratic form to canonical form. | К3 | 1 | | | | | | | |
| CO2 | Apply differentiation and integration technique to solve algebraic and transcendental function | К3 | 2 | | | | | | | |
| CO3 | Evaluate the total derivative of the function, expand the given as series and locate the maximum and minimum for multivariate function | K5 | 3 | | | | | | | |
| CO4 | Solve first order Ordinary Differential Equations and apply them to certain physical situations | К3 | 4 | | | | | | | |
| CO5 | Choose appropriate integral techniques to find area and volume of the given region | K5 | 5 | | | | | | | |

COURSE CONTENT

Topic - 1 PROPERTIES OF MATTER

9

Hooke's Law - Stress-Strain Diagram - Elastic moduli - Poisson's Ratio - Expression for bending moment of beam and depression of Cantilever - Expression for Young's modulus by Non-uniform bending and its experimental determination.

Topic - 2 CRYSTAL PHYSICS

Single crystalline, polycrystalline and amorphous materials – single crystals: unit cell, crystal systems, Bravais lattices, directions and planes in a crystal, Miller indices – inter-planar distances - coordination number and packing factor for SC, BCC, FCC, HCP and diamond structures - growth of single crystals: solution and melt growth techniques.

Topic - 3 LASER TECHNOLOGY 9

Introduction – principle of spontaneous emission and stimulated emission, population inversion, pumping mechanism. Laser characteristics - Einstein's A and B coefficients derivation. Two, three and four level systems. Threshold gain coefficient- Component of laser. Solid state laser (Nd:YAG). Diode lasers –Application of laser in science and engineering.

Topic - 4 THERMAL PHYSICS 9

Transfer of heat energy - thermal conduction, convection and radiation - heat conductions in solids - thermal conductivity - Lee's disc method - theory and experiment - conduction through compound media (series and parallel) - thermal insulation - applications: heat exchangers, refrigerators, ovens and solar water heaters.

Topic - 5 NANO TECHNOLOGY 9

Introduction to Nano materials- Moore's law- Properties of Nano materials- Quantum well, wire and dot-Fullerene, Carbon Nanotubes- Application of Nanotechnology in industry.

| INDIRECT | 1 | Course Exit Survey | | | | | | | |

| | COURSE CONTENT | |
|-----------|--------------------------------------|---|
| Topic - 1 | INTRODUCTION TO MS-WORD AND MS-EXCEL | 9 |

Introduction to word – Creating, editing, saving and printing text documents - Font and paragraph formatting - Simple character formatting -Inserting tables, smart art, page breaks -Using lists and styles-Working with images -Using Spelling and Grammar check -Understanding document properties

Introduction to Spreadsheet basics - Creating, editing, saving and printing spreadsheets -Working with functions & formulas -Modifying worksheets with colour & auto formats -Graphically representing data : Charts & Graphs - Data Menu, Subtotal, Filtering Data -Formatting worksheets -Securing & Protecting spreadsheets

Topic - 2 MS-POWERPOINT AND INTERNET 9

Introduction to PowerPoint- Opening, viewing, creating, and printing slides -Applying auto layouts -Adding custom animation -Using slide transitions -Graphically representing data : Charts & Graphs -Creating Professional Slide for Presentation.

Internet - Understanding how to search/Google -bookmarking and Going to a specific website -Copy and paste Internet content into your word file and emails -Understanding social media platforms such as Facebook & Many more -learn with best practices

Topic - 3 C PROGRAMMING BASICS 9

Problem formulation – Problem Solving - Introduction to 'C' programming –fundamentals – structure of a 'C' program – compilation and linking processes – Constants, Variables – Data Types – Expressions using operators in 'C' – Managing Input and Output operations – Decision Making and Branching – Looping statements – solving simple scientific and statistical problems.

Topic - 4 ARRAYS AND STRINGS 9

Arrays – Initialization – Declaration – One dimensional and Two dimensional arrays. String- String operations – String Arrays. Simple programs- sorting- searching – matrix operations.

Topic - 5 FUNCTIONS, STRUCTURES AND UNIONS 9

Function – definition of function – Declaration of function – Pass by value – Pass by reference – Recursion - Structure – need for structure data type – structure definition – Structure declaration – Structure within a structure - Union - Programs using structures and Unions – Storage classes, Pre-processor directives.

| | COURSE CONTENT | | | | | | | | |
|-----------|---|-----|--|--|--|--|--|--|--|
| Topic - 1 | SECOND AND HIGHER ORDER ORDINARY DIFFERENTIAL EQUATIONS | 9+3 | | | | | | | |

Second order linear differential equations with constant co-efficient – Cauchy equation – Euler equation – Cauchy –Legendre equation – Method of variation of parameters – Solution of simultaneous equation with constant coefficients

Topic - 2 VECTOR CALCULUS 9 + 3

Introduction—gradient—directional derivative—divergence and curl—angel between the surfaces—solenoidal and irrotational vector fields—Green's theorem in a plane—Gauss divergence theorem—Stoke's theorem (without proof).

Topic - 3 LAPLACE TRANSFORMS 9 + 3

Condition for existence—Transform of elementary function—Basic properties(without proof)—Derivatives and integrals of transforms—Transform of unit step function—Initial and final value theorem(statement only)—Transform of a periodic function—Inverse Laplace transform—Partial fractions method—convolution theorem(statement only)—Solution of linear ODE of second order with constant co-efficients.

Topic - 4 ANALYTIC FUNCTIONS 9+3

Analytic function – Necessary and sufficient condition – Cauchy Rieman equation (without proof) – Properties of analytic function (statement only) – Harmonic function – Constructions of analytic function – Bilinear

transformation – Conformal mappings w = z + a, w = az, $w = \frac{1}{z}$

Topic - 5 COMPLEX INTEGRATION 9 + 3

Cauchy's integral theorem (without proof) –Cauchy integral formula –Taylor's and Laurent's series (without proof) – Singularities –Cauchy's residue theorem – Contour Integration: Circular and Semi circular contour (excluding polar on real axis).

| | 2 | rammar Quizzes | | | | | | |
| | 3 | End Semester Examinations | | | | | | |
| INDIRECT | 1 | Course Exit Survey | | | | | | |

Topic - 1 COURSE CONTENT 9

Listening: Listening practice – different types of conversation and answering questions – gap exercises **Speaking:** Introduce one self and others – Opening a conversation **Reading:** Reading a novel, itinerary, Magazine and News papers **Writing:** Formal Letters – Job application letter with CV and Resume **Grammar:** Kinds of Sentences – Sentence Pattern (Parts/ Patterns/ Column Analysis).

Topic - 2 9

Listening: Short texts – Listening to situation based dialogues – Listening to talks on engineering - **Speaking:** Sharing information of a personal kind – greeting – taking leave– **Reading:** Comprehension Questions (multiple choice questions and short questions) – short narrative stories - **Writing:** Paragraph Writing – Filling Forms – Basics of Business writing – Placing Orders, Letter of Complaint - **Grammar:** Asking Questions in the Simple Present – Using reference words, Yes/No type questions.

Topic - 3 9

Listening: Listening to academic lectures and live speech – advertisements and announcements –**Speaking:** Giving and Justifying opinions – apologizing – Introduction to Presentation – **Reading:** Reading Blogs – Website articles – Paragraphing – **Writing:** Tweets – Texting and SMS language – Use of Sequence Words - **Grammar:** Using Past Tense to make correct sentences – WH questions.

Topic - 4 | 9

Listening: Listening to a telephone conversation – Documentaries and making notes – **Speaking:** Giving Instructions – Role play – Asking about routine actions – **Reading:** Reading detailed comprehension - **Writing:** Writing Reports – Preparing Checklist - **Grammar:** Make sentences from Future Tense and their Usages (Compare the sentences with Degrees of Comparison).

Topic - 5 9

Listening: Viewing a model group discussion and reviewing the performance of each participant – Casual Conversation - **Speaking:** Participating in a Group Discussion – Speeches for special Occasions– **Reading:** Making notes from long passage or any form of written materials – providing a suitable title – **Writing:** Brainstorming – Writing short essays - **Grammar:** Numerical Adjectives – Misspelled Words – Direct and Indirect speech – Spot the Errors.

| | COURSE LEARNING OUTCOMES (COs) | | | | | | | | |
|-------|--|-------------------|---|--|--|--|--|--|--|
| After | RBT Level | Topics Covered | | | | | | | |
| CO1 | Classify and make use of python programming elements to solve and debug simple logical problems. | K2 | 1 | | | | | | |
| CO2 | Experiment with the various control statements in Python. | К3 | 2 | | | | | | |
| CO3 | Develop python programs using functions and strings. | К3 | 3 | | | | | | |
| CO4 | Experiment with the usage of pointers and functions. | К3 | 4 | | | | | | |
| CO5 | Analyze a problem and use appropriate packages and modules to solve it. | K4 | 5 | | | | | | |

| PRE-REQUISITE C PROGRAMMING | |
|-----------------------------|--|
|-----------------------------|--|

COURSE CONTENT

Topic - 1 ENVIRONMENT AND ECOSYSTEMS

9

Definition, scope and importance of environment – need for public awareness - concept of an ecosystem – structure and function of an ecosystem – producers, consumers and decomposers – energy flow in the ecosystem – ecological succession – food chains, food webs – Introduction, types, characteristic features, structure and function of the forest ecosystem aquatic ecosystems (ponds, river and marine).

Activity: Study of the ecosystem structure in Cauvery River.

Topic - 2 BIODIVERSITY 9

Introduction to biodiversity definition: genetic, species and ecosystem diversity –value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values – Biodiversity at global, national and local levels – India as a mega-diversity nation – hot-spots of biodiversity – threats to biodiversity – endangered and endemic species of India – In-situ and ex- situ conservation of biodiversity.

Activity: Study of common plants, insects, birds.

Topic - 3 ENVIRONMENTAL POLLUTION

9

Definition – causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Thermal pollution (d) Noise pollution – solid waste management: causes, effects and control measures of municipal solid wastes – Hazardous and biomedical waste management -pollution case studies.

Activity: Study of air and water pollution in industry.

Topic - 4 NATURAL RESOURCES

9

Forest resources: over-exploitation, deforestation, – Water resources: Rain water harvesting-watershed management - utilization of surface and ground water, conflicts over water, dams-benefits and problems Food resources: effects of modern agriculture, fertilizer-pesticide problems - Principles of Green Chemistry- Case studies

Activity: Tree plantation and maintenance within the campus.

Topic - 5

SUSTAINABILITY AND POPULATION

.

From unsustainable to sustainable development – environmental Impact Assessment (EIA) – environmental ethics: Issues and possible solutions – climate change, acid rain, ozone layer depletion, and case studies – environment production act – Air (Prevention and Control of Pollution) act – Water (Prevention and control of Pollution) act – environment and human health – value education – HIV / AIDS – women and child welfare.

Activity: Small group meetings about environment and human health in local area peoples and making poster and short films about HIV / AIDS – women and child welfare.

| | COURSE CONTENT | |
|-----------|----------------|-----|
| Topic - 1 | INTRODUCTION | 9+3 |

Basic Terminologies: Elementary Data Organizations, Data Structure Operations: insertion, deletion, traversal etc.; Analysis of an Algorithm, Asymptotic Notations, Time- Space trade off. Searching: Linear Search and Binary Search Techniques and their complexity analysis.

Topic - 2 STACKS AND QUEUES 9+3

ADT Stack and its operations: Algorithms and their complexity analysis, Applications of Stacks: Expression Conversion and evaluation – corresponding algorithms and complexity analysis. ADT queue, Types of Queue: Simple Queue, Circular Queue, Priority Queue; Operations on each types of Queues: Algorithms and their analysis.

Topic - 3 LINKED LIST 9+3

Singly linked lists: Representation in memory, Algorithms of several operations: Traversing, Searching, Insertion into, Deletion from linked list; Linked representation of Stack and Queue, Header nodes, Doubly linked list: operations on it and algorithmic analysis; Circular Linked Lists: all operations their algorithms and the complexity analysis

Topic - 4 TREES 9+3

Basic Tree Terminologies, Different types of Trees: Binary Tree, Threaded Binary Tree, Binary Search Tree, AVL Tree; Tree operations on each of the trees and their algorithms with Complexity analysis. Applications of Binary Trees. B Tree, B+ Tree: definitions, algorithms and analysis.

Topic - 5 GRAPHS 9+3

Definitions, Topological Sort, Shortest-path Algorithm, Unweighted Shortest paths ,Dijkstra's Algorithm Minimum Spanning Tree, Prim's Algorithm, Kruskal Algorithm, Application of Depth –First Search, Undirected graphs, Bio connectivity.

| | COURSE CONTENT | |
|-----------|-----------------------------------|---|
| Topic - 1 | BASIC CONCEPTS OF DIGITAL SYSTEMS | 9 |

Review of Number systems, Number Representation, Binary Arithmetic and Logic gates, Boolean algebra, Boolean postulates and laws - De-Morgan's Theorem - Principle of Duality, Simplification using Boolean algebra, Canonical forms - Sum of product and Product of sum - Minimization using Karnaugh map and Tabulation method.

Topic - 2 COMBINATIONAL CIRCUITS 9

Realization of combinational logic using gates , Design of combinational circuits : Adder , Subtractor, Parallel adder / Subtractor, Carry look ahead adder, Magnitude Comparator, Parity generator and checker, Encoder, Decoder, Multiplexer, Demultiplexer - Function realization using Multiplexer, Decoder - Code Converters.

Topic - 3 SYNCHRONOUS SEQUENTIAL CIRCUITS 9

Flip-flops - SR, JK, D and T- Master-Slave - Triggering - Analysis of clocked sequential circuits - State reduction and assignment - Excitation table - Design procedure - Shift registers - Universal shift registers - Ripple counters - Synchronous counters - Ring counter - Johnson Counter.

Topic - 4 ASYNCHRONOUS SEQUENTIAL CIRCUITS 9

Algorithmic State Machines (ASM) - Asynchronous sequential logic - Analysis procedure - Circuits with latches - Design procedure - Reduction of State and Flow tables - Race free state assignments - Hazards.

Topic - 5 LOGIC FAMILIES AND PROGRAMMABLE DEVICES 9

Introduction to Logic families – ECL, TTL &CMOS - Programmable Logic Devices – Programmable Logic Array(PLA) - Programmable Array Logic (PAL) – Implementation of combinational logic circuits using PLA, PAL.

COURSE CONTENT

Topic - 1 BASIC STRUCTUTRE OF COMPUTERS

9

Functional Units - Basic Operational Concepts - Bus Structures - Performance - Memory Locations and Addresses - Memory Operations - Instruction and Instruction Sequencing - Addressing Modes - Basic I/O Operations.

Topic - 2 ARITHMETIC UNIT 9

Addition and Subtraction of Signed Numbers - Design of Fast Adders - Multiplication of Positive Numbers - Signed Operand Multiplication - Fast Multiplication - Integer Division - Floating Point Numbers and Operations.

Topic - 3 BASIC PROCESSING UNIT 9

Fundamental Concepts - Execution of a Complete Instruction - Multiple Bus Organization - Hardwired Control - Micro programmed Control - Microinstructions- Microprogram Sequencing- Wide Branch Addressing

Topic - 4 MEMORY SYSTEM 9

Basic Concepts - Speed, Size and Cost - Cache Memories - Performance Considerations - Virtual Memories - memory management requirements

Topic - 5 PIPELINING AND I/O ORGANIZATION 9

Basic Concepts - Data Hazards - Instruction Hazards - Influence on instruction sets - Data path and control considerations - Superscalar operation - Accessing I/O devices- Interrupts - Enabling and disabling interrupts-Handling multiple devices - Direct Memory Access. Case study - ARM interrupt structure

COURSE CONTENT

Topic - 1 INTRODUCTION TO OBJECT ORIENTED PROGRAMMING AND JAVA

9

Introduction to OOP- Java Fundamentals - Data Types, Variables, and Arrays Operators - Control Statements - Classes - Methods - Constructors- Garbage Collection.

Topic - 2

INHERITANCE AND EXCEPTION HANDLING

9

Inheritance – Packages and Interfaces - Exception Handling Fundamentals – Java's Built - in Exceptions - Creating new Exception subclasses.

Topic - 3 POLYMORPHISM AND MULTI THREADING IN JAVA

9

Polymorphism- Abstract classes and methods-Overloading-Overriding-final methods and classes –Multithreaded programming –The Thread class and the Runnable Interface- Creating multiple threads-Synchronization-Auto boxing and Annotations (Metadata).

Topic - 4

STRING HANDLING ANDCOLLECTION FRAMEWORK

9

String Constructors-String Operations-Generic classes and methods-The Collection Framework- Collections-List-Array List, Linked List, Set-HashzSet, Linked HashSet, Queue-Priority Queue, Map-Hash Map, Sorted Map, Tree Map.

Topic - 5

FILES AND STREAMSIN JAVA

9

Files and streams – Byte Stream-I/O Stream, File I/O Stream, Byte Array I/O Stream - Character Stream - File Reader and Writer, Char Array Reader and Writer - Serialization.

| | LIST OF EXPERIMENTS | | | | | | | | | |
|-----|--|--|--|--|--|--|--|--|--|--|
| 1 | Write a program to find the factorial of a given number. | | | | | | | | | |
| 2 | Write a program to print numbers in sorting order. | | | | | | | | | |
| 3 | Create a class Odometer that displays the number of kilometers a vehicle run. Give samples as trip information like number of kilometers travelled, fuel consumption per litre. The task is to find the mileage of the vehicle running at different samples of trip information. | | | | | | | | | |
| 4 | Create a class Day that represents day, month and year of the calendar day. The class Day should be able to accept the date, update the date, delete the date from a calendar list of activities. Create a class Time that represents hours, minutes, seconds of a clock. The class Time should accept the time, update the time, delete the time from a list of events created for a day using the Day Class. | | | | | | | | | |
| 5 | Write a program on illustration of use of packages | | | | | | | | | |
| 6 | Write a program to implement interfaces. | | | | | | | | | |
| 7 | Write a program that implements a stack ADT that converts infix expression into postfix expression. | | | | | | | | | |
| 8 | Write a program to read a file and displays the file on the screen within line number before each line. | | | | | | | | | |
| 9 | Write a program to copy contents of a file into another file using File streams. | | | | | | | | | |
| 10 | Write a program for handling Array Index Out of Bounds Exception and Divide-by- zero Exception. | | | | | | | | | |
| 11 | Write a program for custom exception creation. | | | | | | | | | |
| 12 | Write a program on multi-threading showing how CPU time is shared among all the threads. | | | | | | | | | |
| 13 | Write a program for Producer-Consumer problem using threads. | | | | | | | | | |
| 14 | Write an applet to handle the mouse events and keyboard events. | | | | | | | | | |
| 15 | Write a program to develop a simple calculator. Using Grid layout arrange buttons for the digits and +,-,* % operations. The computation should be performed with a button click "Compute". Display the result on a text field. | | | | | | | | | |

| COURSE CONTENT | | | | | | |
|----------------|--------------|---|--|--|--|--|
| Topic - 1 | INTRODUCTION | 9 | | | | |

Historical Background – Constituent Assembly of India – Philosophical foundations of the Indian Constitution – Preamble – Fundamental Rights – Directive Principles of State Policy – Fundamental Duties – Citizenship – Role of the Election Commission.

Topic - 2 STRUCTURE AND FUNCTION OF CENTRAL AND STATE GOVERNMENT

Union Government – Structures of the Union Government and Functions – President – Vice President – Prime Minister – Cabinet – Parliament – Supreme Court of India – Judicial Review. State Government – Structure and Functions – Governor – Chief Minister – Cabinet – State Legislature – Judicial System in States – High Courts and other Subordinate Courts.

Topic - 3 CONSTITUTION FUNCTIONS OF INDIA AND INDIAN SOCIETY

Indian Federal System – Central – State Relations – President's Rule – Constitutional Amendments – Constitutional Functionaries - Assessment of working of the Parliamentary System in India. Society: Nature, Meaning and definition; Indian Social Structure; Caste, Religion, Language in India; Constitutional Remedies for citizens – Political Parties and Pressure Groups; Right of Women, Children and Scheduled Castes and Scheduled Tribes and other Weaker Sections

Topic - 4 POLICIES AND ACTS – GENERAL 9

Insurance and Bonding – Laws Governing Sale, Purchase and use of Urban and Rural Land – Land Revenue Codes – Tax Laws – Income Tax, Sales Tax, Excise and Custom duties and their Influence on Construction Cost – Legal Requirements for Planning – Property Law – Agency Law – Local Government Laws for Approval.

Topic - 5 POLICIES AND ACTS ON INFRASTRUCTURE DEVELOPMENT 9

A Historical Review of the Government Policies on Infrastructure – Current Public Policies on Transportations – Power and telecom Sector – Plans for Infrastructure Development – Legal framework for Regulating Private Participation in Roads and Highways – Ports and Airport and Telecom.

| | After Successful completion of the course, the students should be able to | RBT Level | Topics Covered | | | | | | | | |
| CO1 | Explain the characteristics of graphical and web user interface in designing a user interface for an application | K2 | 1 | | | | | | | | |
| CO2 | Develop an effective user interface considering human characteristics, interaction speeds and business functions in relevance to design standards and guidelines | К3 | 2 | | | | | | | | |
| CO3 | Develop system menus, navigation schemes, windows, buttons, text boxes, selection controls and presentation controls for a user interface. | К3 | 3 | | | | | | | | |
| CO4 | Demonstrate the use of multimedia system components in creating text, graphics, icons, images and video for web pages. | K2 | 4 | | | | | | | | |
| CO5 | Develop test cases and evaluate the working system of windows layout for a mobile user interface. | К3 | 5 | | | | | | | | |

| PRE-REQUISITE | OBJECT ORIENTED PROGRAMMING WITH JAVA |

| COURSE CONTENT | | | | |
|----------------|--------------------------------|-----|--|--|
| Topic - 1 | INTRODUCTION TO USER INTERFACE | 9+3 | | |

Defining the User Interface – Importance and Benefits of Good Design - Graphical User Interface – Direct Manipulation - Characteristics of Graphical User Interface- Characteristics of Web User Interface Principles of User Interface Design.

Topic - 2 HUMAN COMPUTER INTERACTION 9+3

Human Characteristics in Design-Human Considerations in Design-Human Interaction Speeds. Business Functions: Business Definition and Requirement Analysis-Determining Basic Business Functions-Design Standards or Style Guides

Topic - 3 MENUS AND WINDOWS 9+3

Menus: Structures and Functions-Content, Formatting, Phrasing the menu, Selection and Navigation of menus-Graphical Menus. Windows: Characteristics- Components-Presentation Styles- Types Organizations – Web Systems-Characteristics of Device-Based-Controls - Screen based controls: Buttons Text Boxes-Selection Controls-Presentation Controls. Case Study: Improper and proper presentation of Command buttons, Menu bars and pull-down.

Topic - 4 MULTIMEDIA 9+3

Text for web pages- Effective Feedback- Guidance and Assistance- Internationalization- Accessibility-Icons and Multimedia-Choosing colors for textual and statistical graphics screens-Choosing colors for web pages. Case Study: Voice UI.

Topic - 5 WINDOWS LAYOUT- TEST 9+3

Organizing and Laying out Screens-Prototypes – Kinds of Tests-Developing and Conducting a Test Analyze, Modify and Retest-Evaluate the Working System. Case Study: Mobile UI.

COURSE CONTENT Topic - 1 INTRODUCTION AND PROCESS CONCEPT 9+3

Operating System Structure – Operating System Operations – Process Management – Memory Management – Storage Management – Protection and Security – System Structures: Operating System Services – User and Operating System Interface – System Calls – Types of System Calls System Programs. Process Scheduling – Operations on Processes – Inter-process Communication.

Case Study: Kernel data structures for various open source operating systems.

Topic - 2 MULTITHREADED PROGRAMMING AND PROCESS SCHEDULING 9+3

Overview of threads – Multi core programming-Multithreading Models – Threading Issues Basic Concepts of process scheduling – Scheduling – Scheduling – Scheduling – Multiple- Processor Scheduling – Synchronization – The Critical-Section Problem – Peterson's Solution Synchronization Hardware – Semaphores – Classic problems of Synchronization – Monitors.

Case Study: Linux Scheduling

Topic - 3 DEADLOCK AND MEMORY MANAGEMENT STRATEGIES 9+3

System Model – Deadlock Characterization – Methods for Handling Deadlock – Deadlock Prevention – Deadlock Avoidance – Deadlock Detection – Recovery from Deadlock. Swapping – Contiguous Memory Allocation – Paging – Structure of the Page Table- Segmentation

Topic - 4 VIRTUAL MEMORY MANAGEMENT AND FILE SYSTEM 9+3

Demand Paging – Copy on Write – Page Replacement – Allocation of Frames – Thrashing File Concept – Access Methods – Directory Structure – File Sharing – Protection

Topic - 5 | IMPLEMENTING FILE SYSTEMS AND SECONDARY STORAGE STRUCTURE | 9+3

File System Structure – File System Implementation – Directory Implementation – Allocation Methods – Free-space Management. Disk Structure – Disk Scheduling – Disk Management – Swap-Space Management. Case Study: Linux File system

| | After Successful completion of the course, the students should be able to | | | | | | | |
| CO1 | State the aim and develop the procedure to conduct the experiment / exercise in the Operating Systems Laboratory Course | К3 | | | | | | |
| CO2 | Demonstrate skills at the level of precision (reliably, quickly, smoothly, and accurately with negligible guidance) in performing the experiment / exercise | К3 | | | | | | |
| CO3 | Draw inferences from the experiment / exercise conducted and present it professionally | K4 | | | | | | |
| CO4 | Demonstrate professionally the results obtained through the experiment / exercise and present conclusions | K4 | | | | | | |
| CO5 | Demonstrate an understanding of the concepts, procedures, and applications through verbal and written communication | К3 | | | | | | |
| CO6 | Demonstrating an attitude at the level of valuing (attaching values and expressing personal opinions by showing some definite involvement and commitment) | К3 | | | | | | |

| | 3 | End Semester Examinations |
| INDIRECT | 1 | Course Exit Survey |

| | COURSE CONTENT | |
|-----------|---|-----|
| Topic - 1 | Course Introduction - Need, Basic Guidelines, Content and Process for Value Education | 6+3 |

- 1. Purpose and motivation for the course, recapitulation from Universal Human Values-I
- 2. Self-Exploration—what is it? Its content and process; 'Natural Acceptance' and Experiential Validation- as the process for self-exploration
- 3. Continuous Happiness and Prosperity- A look at basic Human Aspirations
- 4. Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority
- 5. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario
- 6. Method to fulfil the above human aspirations: understanding and living in harmony at various levels.

Topic - 2 Understanding Harmony in the Human Being - Harmony in Myself! 6+3

- 7. Understanding human being as a co-existence of the sentient 'I' and the material 'Body'
- 8. Understanding the needs of Self ('I') and 'Body' happiness and physical facility
- 9. Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer)
- 10. Understanding the characteristics and activities of 'I' and harmony in 'I'
- 11. Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail
- 12. Programs to ensure Sanyam and Health.

Topic - 3 Understanding Harmony in the Family and Society- Harmony in Human Relationship 6+3

- 13. Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship
- 14. Understanding the meaning of Trust; Difference between intention and competence
- 15. Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship
- 16. Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals
- 17. Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family.

| Topic - 4 | Understanding Harmony in the Nature and Existence - Whole existence as | | | | | |
|-----------|--|-----|--|--|--|--|
| | Coexistence | 6+3 | | | | |

- 18. Understanding the harmony in the Nature
- 19. Interconnectedness and mutual fulfilment among the four orders of nature recyclability and self regulation in nature
- 20. Understanding Existence as Co-existence of mutually interacting units in all pervasive space
- 21. Holistic perception of harmony at all levels of existence.

| Topic - 5 | Implications of the above Holistic Understanding of Harmony on | 6+3 |
|-----------|--|-----|
| | Professional Ethics | 0-3 |

- 22. Natural acceptance of human values
- 23. Definitiveness of Ethical Human Conduct
- 24. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order
- 25. Competence in professional ethics: a. Ability to utilize the professional competence for augmenting universal human order b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems, c. Ability to identify and develop appropriate technologies and management patterns for above production systems.
- 26. Case studies of typical holistic technologies, management models and production systems
- 27. Strategy for transition from the present state to Universal Human Order: a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers b. At the level of society: as mutually enriching institutions and organizations
- 28. Sum up

|-----------|---------------------------------------|---|
| Topic - 1 | SECURITY REQUIREMENTS AND SECURE SDLC | 9 |

What is Information Security?, Critical Characteristics of Information, NSTISSC Security Model, Components of an Information System, Securing the Components, Balancing Security and Access, The SDLC, The Security SDLC.

Topic - 2 SECURITY INVESTIGATION 9

Need for Security, Business Needs, Threats, Attacks, Legal, Ethical and Professional Issues - An Overview of Computer Security - Access Control Matrix, Policy-Security policies, Confidentiality policies, Integrity policies and Hybrid policies

Topic - 3 SECURITY ANALYSIS 9

Risk Management: Identifying and Assessing Risk, Assessing and Controlling Risk - Systems: Access Control Mechanisms, Information Flow and Confinement Problem.

Topic - 4 LOGICAL DESIGN 9

Blueprint for Security, Information Security Policy, Standards and Practices, ISO 17799/BS 7799, NIST Models, VISA International Security Model, Design of Security Architecture, Planning for Continuity.

Topic - 5 PHYSICAL DESIGN 9

Security Technology, IDS, Scanning and Analysis Tools, Cryptography, Access Control Devices, Physical Security, Security and Personnel.

COURSE CONTENT

Topic - 1 INTRODUCTION

9

Social Network Analysis: Definition and Features – The Development of Social Network Analysis – Basic Graph Theoretical Concepts of Social Network Analysis – Ties, Density, Path, Length, Distance, Betweenness, Centrality, Clique – Electronic Sources for Network Analysis – Electronic Discussion Networks, Blogs and Online Communities, Web-based Networks – Applications of Social Network Analysis

Topic - 2

SOCIAL NETWORKANALYSIS

9

Introduction to Social Networks Profiles – Types of Commercial Social Network Profiles (CSNP) – Quantitative and Qualitative Analysis of CSNP – Analysis of Social Networks Extracted from Log Files – Data Mining Methods Related to SNA and Log Mining – Clustering Techniques – Case Study.

Topic - 3 | SEMANTIC TECHNOLOGY FOR SOCIAL NETWORK ANALYSIS

9

Introduction to Ontology based Knowledge Representation – Ontology Languages for the Semantic Web – RDF and OWL – Modelling Social Network Data – Network Data Representation, Ontological Representation of Social Individuals and Relationships – Aggregating and Reasoning with Social Network Data – Advanced Representations

Topic - 4 SOCIAL NETWORK MINING

9

Detecting and Discovering Communities in Social Network: Evaluating Communities – Methods for Community Detection – Applications of Community Mining Algorithms –Ethical Practices in Social Network Mining – Understanding and Predicting Human Behaviour for Social Communities – Decentralized Online Social Networks – Multi-Relational Characterization of Dynamic Social Network Communities – Inferential Methods in Social Network Analysis.

Topic - 5 VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS

9

Visualization of Social Networks Node-Edge Diagrams – Random Layout – Force-Directed Layout – Tree Layout – Matrix Representations – Matrix and Node-Link Diagrams – Hybrid Representations – Visualizing Online Social Networks – Applications – Covert Networks – Community Welfare – Collaboration Networks – Co-Citation Networks – Data Privacy in Social Networks.

COURSE CONTENT

Topic - 1 OPERATING SYSTEMS AND PROCESS MANAGEMENT

9

Operating System Overview: Objectives and Functions — Evolution of Operating Systems — Computer Organization — Operating System Operations — Services — System Calls — System Programs — Operating System Structure — OS Generation — System Boot. Processes: Process concept — Process scheduling — Operations on processes — Inter process communication — Threads: Overview — Multicore Programming — Multithreading Models. Case Study: Linux Process and Thread Managements.

Topic - 2 PROCESS SCHEDULING AND SYNCHRONIZATION

9

CPU Scheduling: Concepts – Scheduling criteria – Scheduling algorithms. Process Synchronization: The critical section problem – Synchronization hardware – Semaphores – Classic problems of synchronization – Monitors. Deadlocks: System model – Deadlock characterization – Methods for handling deadlocks – Deadlock prevention – Deadlock avoidance – Deadlock detection – Recovery from deadlock. Case Study: Linux Schedulin

Topic - 3 MEMORY MANAGEMENT

9

Main Memory: Background – Swapping – Contiguous memory allocation – Paging – Segmentation. Virtual Memory: Background – Demand paging – Page replacement – Allocation of frames – Thrashing. Case Study: Linux Memory Management.

Topic - 4 | FILE SYSTEMS

9

File-System Interface: File concept – Access methods – Directory and disk structure – File-system mounting – Sharing and Protection. File-System Implementation: Structure and Implementation – Directory implementation – Allocation methods – Free-space management. Case Study: Linux Virtual File System.

Topic - 5 I/O SYSTEMS

9

I/O Systems: I/O Hardware - Mass Storage Structure: Overview, Disk Structure and Attachment - Disk Scheduling and Management - Swap-space management - RAID. Mobile OS: iOS and Android - Architecture and SDK Framework, Media Layer, Services Layer, Core OS Layer, File System.

Topic - 1 HUMAN VALUES

10 - Living

Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time – Cooperation – Commitment – Empathy – Self confidence – Character – Spirituality – Introduction to Yoga and meditation for professional excellence and stress management.

Topic - 2 ENGINEERING ETHICS

9

Senses of Engineering Ethics – Variety of moral issues – Types of inquiry – Moral dilemmas – Moral Autonomy – Kohlberg's theory – Gilligan's theory – Consensus and Controversy – Models of professional roles – Theories about right action – Self-interest – Customs and Religion – Uses of Ethical Theories.

Topic - 3 ENGINEERING AS SOCIAL EXPERIMENTATION

9

Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics –A Balanced Outlook on Law.

Topic - 4 SAFETY, RESPONSIBILITIES AND RIGHTS

9

Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk -Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest –Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) – Discrimination.

Topic - 5 GLOBAL ISSUES

8

Multinational Corporations – Environmental Ethics – Computer Ethics – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Moral Leadership – Code of Conduct – Corporate Social Responsibility.

| Topic - 1 | FUNDAMENTALS OF IOT | 6 |

Introduction, Definitions & Characteristics of IOT, IOT Architectures, Physical & Logical Design of IOT, Enabling Technologies in IOT, History of IOT, About things in IOT, The identifiers in IOT, About the Internet in IOT, IOT frameworks, IOT and M2M

Topic - 2 INDUSTRIAL INTERNET APPLICATIONS 6

Industrial internet application:- IOT Fundamentals and components, industrial Manufacturing, monitoring, control, optimization and autonomy, introduction to Hadoop and big data analytics.

Topic - 3 APPLICATIONS IN AGRICULTURE 6

Applications in agriculture :- Smart Farming : Weather monitoring , Precision farming , Smart Greenhouse , Drones for pesticides

Topic - 4 APPLICATIONS IN IOT 6

Introduction: - Applications in iot enabled smart cities: - Energy consumption, smart energy meters, Home automation, smart grid and solar grid energy harvesting, intelligent parking data lake services scenarios

Topic - 5 HEALTH CARE APPLICATIONS 6

Introduction: Architecture of iot for health care, Multiple views coalescence, SBC –ADL to construct the system architecture. Use Cases Wearable devices for remote monitoring of Physiological, ECG, EEG, Diabetes and Blood pressure.

| | COURSE CONTENT |

| Experiment- 1 | Create a web site for our college with HTML5 and CSS3 (Include Media elements & all types of style sheets). |
| Experiment- 2 | Create a XHTML document for the college website with Text styling, Linking, Images, Lists, Table by highlighting the facilities in the department |
| Experiment- 3 | Create an XHTML document for an online Bookstore that has a Registration form with text box, Radio Button, Selection box, Checkbox, Submit and reset buttons |
| Experiment- 4 | Write a JavaScript code to validate the following fields in an email registration form. Name should contain alphabets. Password should not be less than 8 characters and include check box to toggle between password visibility (Show password) Email-Id should not contain any invalid characters and must follow the standard pattern (user@domain.com) Phone number should contain 10 digits only and all the fields must be filled for successful form submission. |
| Experiment- 5 | Write a Java Servlet program to print current date and time of the web server. |
| Experiment- 6 | Write a JSP program to validate the username and password and display the welcome message if login successfully or display an error message. |
| Experiment- 7 | Create a webpage to dynamically load the student information from the database using AJAX with PHP. |
| Experiment- 8 | Develop a simple webpage for calculator using AngularJS. |
| Experiment- 9 | Write a JSP code to retrieve the xhtml form values and print those values in JSP pages. |

| Experiment- 10 | Write a Ja | Vrite a JavaScript function to get nth largest element from an unsorted array. | | | | | | | |
|----------------|-----------------------|--|---|--|-----------|----|--|-------|----|
| Experiment- 11 | Write a pr | rite a program to connect a XML web page to any database engine. | | | | | | | |
| Experiment- 12 | Write a proscripting. | rite a program to store the form fields in a database, use any appropriate Server Slide ripting. | | | | | | | |

|----------------|
| COURSE CONTENT |

Topic - 1 KNOWLEDGE MANAGEMENT

9

An Introduction to Knowledge Management - The foundations of knowledge management- including cultural issues- technology applications organizational concepts and processes- management aspects- and decision support systems. The Evolution of Knowledge management: From Information Management to Knowledge Management - Key Challenges Facing the Evolution of Knowledge Management - Ethics for Knowledge Management.

Topic - 2 | CREATING THE CULTURE OF LEARNING AND KNOWLEDGE SHARING

9

Organization and Knowledge Management - Building the Learning Organization. Knowledge Markets: Cooperation among Distributed Technical Specialists – Tacit Knowledge and Quality Assurance

Topic - 3 KNOWLEDGE MANAGEMENT-THE TOOLS

9

Telecommunications and Networks in Knowledge Management - Internet Search Engines and Knowledge Management - Information Technology in Support of Knowledge Management - Knowledge Management and Vocabulary Control - Information Mapping in Information Retrieval -Information Coding in the Internet Environment - Repackaging Information.

Topic - 4 KNOWLEDGEMANAGEMENT-APPLICATION

9

Components of a Knowledge Strategy - Case Studies (From Library to Knowledge Center, Knowledge Management in the Health Sciences, Knowledge Management in Developing Countries).

Topic - 5 FUTURE TRENDS AND CASE STUDIES

9

Advanced topics and case studies in knowledge management - Development of a knowledge management map/plan that is integrated with an organization's strategic and business plan - A case study on Corporate Memories for supporting various aspects in the process life -cycles of an organization.

COURSE CONTENT UNIT-1 INTRODUCTION TO VISUALIZATION 9

Visualizing Data-Mapping Data onto Aesthetics, Aesthetics and Types of Data, Scales Map Data Values onto Aesthetics, Coordinate Systems and Axes- Cartesian Coordinates, Nonlinear Axes, Coordinate Systems with Curved Axes, Colour Scales-Colour as a Tool to Distinguish, Colour to Represent Data Values, Colour as a Tool to Highlight, Directory of Visualizations- Amounts, Distributions, Proportions, x—y relationships, Geospatial Data

UNIT - 2 VISUALIZING DISTRIBUTIONS 9

Visualizing Amounts-Bar Plots, Grouped and Stacked Bars, Dot Plots and Heatmaps, Visualizing Distributions: Histograms and Density Plots- Visualizing a Single Distribution, Visualizing Multiple Distributions at the Same Time, Visualizing Distributions: Empirical Cumulative Distribution Functions and Q-Q Plots-Empirical Cumulative Distribution Functions, Highly Skewed Distributions, Quantile-Quantile Plots, Visualizing Many Distributions at Once-Visualizing Distributions Along the Vertical Axis, Visualizing Distributions Along the Horizontal Axis

UNIT - 3 VISUALIZING ASSOCIATIONS & TIME SERIES 9

Visualizing Proportions-A Case for Pie Charts, A Case for Side-by-Side Bars, A Case for Stacked Bars and Stacked Densities, Visualizing Proportions Separately as Parts of the Total ,Visualizing Nested Proportions-Nested Proportions Gone Wrong, Mosaic Plots and Tree maps, Nested Pies ,Parallel Sets. Visualizing Associations Among Two or More Quantitative Variables-Scatterplots, Correlograms, Dimension Reduction, Paired Data. Visualizing Time Series and Other Functions of an Independent Variable-Individual Time Series , Multiple Time Series and Dose–Response Curves, Time Series of Two or More Response Variables

UNIT - 4 VISUALIZING UNCERTIANITY 9

Visualizing Trends-Smoothing, Showing Trends with a Defined Functional Form, Detrending and Time-Series Decomposition, Visualizing Geospatial Data-Projections, Layers, Choropleth Mapping, Cartograms, Visualizing Uncertainty-Framing Probabilities as Frequencies, Visualizing the Uncertainty of Point Estimates, Visualizing the Uncertainty of Curve Fits, Hypothetical Outcome Plot

UNIT - 5 PRINCIPLE OF PROPORTIONAL INK 9

The Principle of Proportional Ink-Visualizations Along Linear Axes, Visualizations Along Logarithmic Axes, Direct Area Visualizations, Handling Overlapping Points-Partial Transparency and Jittering, 2D Histograms, Contour Lines, Common Pitfalls of Colour Use-Encoding Too Much or Irrelevant Information , Using Nonmonotonic Colour Scales to Encode Data Values, Not Designing for Colour-Vision Deficiency

|-----------|---------------------------|---|
| Topic - 1 | INTRODUCTIONTO CYBERCRIME | 9 |

Cybercrime- definition and origins of the world- Cybercrime and information security Classifications of cybercrime- Cybercrime and the Indian ITA 2000 - A Global Perspective on cybercrimes- Cloud Computing-Proliferation of Mobile and Wireless Devices- Trends in Mobility, Credit Card Frauds in Mobile and Wireless Computing Era.

Topic - 2 CYBER SECURITY CHALLENGES IN MODERN DEVICES 9

Security Challenges Posed by Mobile Devices- Registry Settings for Mobile Devices Authentication Service Security- Attacks on Mobile/Cell Phones, Mobile Devices, - Security Implications for Organizations- Organizational Measures for Handling Mobile-Devices-Related Security Issues Organizational Security Policies and Measures in Mobile Computing Era, Laptops.

Topic - 3 TOOLS AND METHODS 9

Tools and Methods Used in Cyber line Proxy Servers and Anonymizers- Phishing -Password Cracking, Key loggers and Spywares, - Virus and Worms, Steganography - DoSDDoS Attacks - SQL Injection, Buffer Over Flow - Attacks on Wireless Networks, Phishing, Identity Theft (ID Theft) - The Legal Perspectives - Cyberlaw: The Indian Context - The Indian IT Act.

Topic - 4 CYBER FORENSICS 9

Understanding Computer Forensics - Historical Background of Cyber forensics - Digital Forensics Science - The Need for Computer Forensics - Cyber forensics and Digital Evidence - Forensics Analysis of Email - Digital Forensics Lifecycle - Chain of Custody Concept - Network Forensics - Approaching a Computer Forensics Investigation - Setting of a Computer Forensics Laboratory: Understanding the Requirements, Computer Forensics and Steganography.

Topic - 5 ORGANIZATIONS IMPLICATIONS 9

Organizational Implications Cost of Cybercrimes and IPR Issues: - Lesson for Organizations Web Treats for Organizations: The Evils and Perils - Security and Privacy Implications from Cloud Computing - Social Media Marketing: Security Risk and Perils for Organization - Social Computing and the Associated Challenges for Organizations - Protecting People- Privacy in the Organization, Organizational Guidelines for Internet Usage - Safe Computing Guidelines and Computer Usage Policy.

COURSE CONTENT

Topic - 1 PROJECT EVALUATION AND PROJECT PLANNING

9

Importance of Software Project Management – Activities Methodologies – Categorization of Software Projects – Stakeholders - Setting objectives – Management Principles – Management Control – Project portfolio Management – Cost–Benefit analysis - Evaluation techniques – Strategic program Management – Stepwise Project Planning

Topic - 2 PROJECT LIFE CYCLE AND EFFORT ESTIMATION

9

Software process and Process Models – Choice of Process models - mental delivery – Rapid Application development – Agile methods – Extreme Programming – SCRUM –Agile Tools: JIRA Agile - Axosoft - Managing interactive processes – Basics of Software estimation – Effort and Cost estimation techniques – COSMIC Full function points - COCOMO II A Parametric Productivity Model - Staffing Pattern – Case Study: Task Manager Application - Evaluation of the Cost Estimation Models.

Topic - 3 ACTIVITY PLANNING AND RISK MANAGEMENT

9

Objectives of Activity planning – Project schedules – Activities – Sequencing and scheduling – Network Planning models – Forward Pass & Backward Pass techniques – Critical path (CPM) method – Risk identification – Assessment – Monitoring – PERT technique – Monte Carlo simulation – Resource Allocation – Creation of critical patterns – Cost schedules. Case Study: Analyzing CPM and PERT methods for project scheduling in a construction company.

Topic - 4 PROJECT MANAGEMENT AND CONTROL

9

Framework for Management and control – Collection of data Project termination – Visualizing progress – Cost monitoring – Earned Value Analysis- Project tracking – Change control- Software Configuration Management – Managing contracts – Contract Management.

Topic - 5 STAFFING IN SOFTWARE PROJECTS

9

Managing people – Organizational behaviour – Best methods of staff selection – Motivation – The OldhamHackman job characteristic model – Ethical and Programmed concerns – Working in teams – Decision making – Team structures – Virtual teams – Communications genres.

| | LIST OF EXPERIMENTS |
|----|--|
| 1 | Case Study: Description of the Syntax of the source Language(mini language) for which the compiler components are designed |
| 2 | Write a C Program to Scan and Count the number of characters, words, and lines in a file. |
| 3 | Write a C Program to implement NFAs that recognize identifiers, constants, and operators of the mini language. |
| 4 | Write a C Program to implement DFAs that recognize identifiers, constants, and operators of the mini language. |
| 5 | Design a lexical analyzer for the given language. The lexical analyzer should ignore redundant spaces, tabs and new lines, comments etc. |
| 6 | Implement the lexical analyzer using JLex, flex or other lexical analyzer generating tools. |
| 7 | Design Predictive Parser for the given language |
| 8 | Design a LALR bottom up parser for the given language |
| 9 | Convert the BNF rules into Yacc form and write code to generate abstract syntax tree. |
| 10 | A program to generate machine code from the abstract syntax tree generated by the parser. |
| 11 | Write a C program to simulate lexical analyzer for validating operators. |

| 12 | Write | Write a C program to recognize strings under 'a', 'a*b+', 'abb'. | | | | | | | | | | | |
|--------|---|--|--|----------|---|--|-----------|----|--|-------|----|--|--|
| 13 | Write a C program to generate machine code from abstract syntax tree generated by the parser | | | | | | | | | | | | |
| 14 | Write a C program to identify whether a given line is a comment or not. | | | | | | | | | | | | |
| 15 | Write a C program to implement Program semantic rules to calculate the expression that takes an expression with digits, + and * and computes the value. | | | | | | | | | | | | |

| | COURSE LEARNING OUTCOMES (COs) | | | | | | |
|------|--|--------------|-------------------|--|--|--|--|
| Upon | completion of the course, students will be able to | RBT Level | Topics Covered | | | | |
| CO1 | Identify the type of data based on the characteristics of datasets, compare trivial data with big data and explain the lifecycle of data analytics for real world applications. | K2 | 1 | | | | |
| CO2 | Discover the storage and processing techniques for big data and apply them for a given scenario using Hadoop | K4 | 2 | | | | |
| CO3 | Analyze big data using quantitative, qualitative and machine learning approaches and implement regression, clustering and classification algorithm for a given big data application. | K4 | 3 | | | | |
| CO4 | Compare data models and computing models used for data analytics and apply predictive modeling for processing unstructured data. | K4 | 4 | | | | |
| CO5 | Develop analytical models for financial services, banking and recommender systems using marketing analysis, sentiment analysis and predictive analysis | К3 | 5 | | | | |

| | PRE-REQUISITE | DATA BASE MANAGEMENT SYSTEM |

| | COURSE CONTENT | | | | | | | | |
|-------------|--|---|--|--|--|--|--|--|--|
| Topic - 1 | FUNDAMENTALS OF BIG DATA | 9 | | | | | | | |
| Data Analyt | ng Big Data: Concepts and Terminology, Big Data Characteristics, Different Types of Daics Lifecycle - Enterprise Technologies and Big Data Business Intelligence. Case Study: Ideeristics and types of data. | _ | | | | | | | |

Topic - 2 STORING AND PROCESSING BIG DATA 9

Big Data Storage Concepts: Clusters, File Systems and Distributed File Systems, NoSQL, Sharding, Replication, CAP Theorem, ACID, BASE - Big Data Processing Concepts: Parallel Data Processing, Distributed Data Processing, Hadoop, Processing Workloads, Cluster, Processing in Batch Mode, Processing in Realtime Mode - Big Data Storage Technology: On-Disk Storage Devices, In-Memory Storage Devices..

Topic - 3 BIG DATA ANALYSIS 9

Quantitative Analysis – Qualitative Analysis – Data Mining – Statistical Analysis – Machine Learning – Semantic Analysis – Visual Analysis – Case Study : Correlation – Regression – Time Series Plot – Clustering – Classification.

Topic - 4 ANALYTICS MODELS – PREDICTIVE MODELING 9

Introduction – Data Models – Computing Models. Predictive Modeling for Unstructured Data: Introduction – Applications of Predictive Modeling – Featured Engineering – Pattern Mining.

Topic - 5 APPLICATIONS FOR BIG DATA ANALYTICS 9

Big Data Analytics for Financial Services and Banking: Introduction – Customer insights and marketing analysis – Sentiment Analysis – Predictive Analytics – Model Building – Fraud detection and Risk Management – Integration of Big Data Analytics into operations. Big Data Analytics and Recommender Systems: Introduction – Background – Overview – Evaluations of Recommenders – Issues..

|-----|--|--------------|-------------------|
| | After Successful completion of the course, the students should be able to | RBT Level | Topics Covered |
| CO1 | Outline the fundamentals of wireless communication technology that facilitate the insight of infrastructure less networks formation, application and design issues of the given Ad hoc and Sensor networks. | K2 | 1 |
| CO2 | Describe the MAC Protocol designing issues and contention—based algorithms with reservation and scheduling to achieve node mobility, time synchronization, bandwidth efficiency and QoS support for the given Ad hoc wireless network. | K2 | 2 |
| CO3 | Explain the issues behind the routing protocol blueprint and classification in transport layer to suit with Ad hoc Wireless Network. | K2 | 3 |
| CO4 | Divide the MAC layer protocols to emphasize the energy efficient operation, efficient neighbor discovery and channel assignment operations for the Wireless sensor networks | K4 | 4 |
| CO5 | Discover the architecture, data handling and localization techniques to optimize the location discovery of sensor nodes for the given wireless sensor networks. | K4 | 5 |

Topic - 1 . CRYPTOCURRENCY AND BLOCKCHAIN-INTRODUCTION

9

Block chain- An Introduction, Distinction between databases and block chain, Distributed ledger. Block chain ecosystem - Consensus Algorithms & Types, Block chain structure, Distributed networks- Distributed Applications (DApps) – Web 3.0 - DApps Ecosystems. Working - Permissioned and permission-less Blockchain – Cross Chain Technologies. – IOT & Blockchain Digital Disruption in Industries – Banking, Insurance, Supply Chain, Governments, IP rights, Creation of trustless Ecosystems – Block chain as a Service – Open Source Block chains

Topic - 2 . CRYPTO CURRENCIES

9

Crypto Currencies - Anonymity and Pseudonymity in Cryptocurrencies - Digital Signatures - Cryptocurrency Hash Codes -Need for Crypto Currencies - Crypto Markets - Explore Crypto Currency Ecosystems - ICOs - Crypto Tokens - Atomic Swaps - Crypto Currency Exchanges - Centralised and Decentralized Crypto exchanges - Regulations on Crypto Currencies & exchanges - Downside of non-regulated currencies - crypto Scams - Exchange hacks.

Topic - 3 BITCOIN

9

History of Money – Dawn of Bitcoin – The Bitcoin Blockchain – The Bitcoin Network – Bitcoin Scripts – Full Nodes vs SPVs – Bitcoin Wallet.

Topic - 4 . ETHEREUM

.

The Ethereum ecosystem, DApps and DAOs - Ethereum working- Solidity- Contract classes, functions, and conditionals- Inheritance & abstract contracts- Libraries- Types & optimization of Ether- Global variables-Debugging-Future of Ethereum- Smart Contracts on Ethereum- different stages of a contract deployment- Viewing Information about blocks in Blockchain- Developing smart contract on private Blockchain- Deploying contract from web and console

Topic - 5 HYPERLEDGER

9

Hyperledger Architecture- Consensus- Consensus & its interaction with architectural layers- Application programming interface- Application model -Hyperledger frameworks- Hyperledger Fabric -Various ways to create Hyperledger Fabric Blockchain network- Creating and Deploying a business network on Hyperledger Composer Playground- Testing the business network definition- Transferring the commodity between the participants

| COURSE CONTENT | | | | | | |
|----------------|--------------|---|--|--|--|--|
| Topic - 1 | INTRODUCTION | 6 | | | | |

Introduction to Cloud Computing – Definition of Cloud – Evolution of Cloud Computing – Underlying Principles of Parallel and Distributed Computing – Cloud Characteristics – Elasticity in Cloud – Ondemand Provisioning.

Topic - 2 CLOUD ENABLING TECHNOLOGIES 6

Service Oriented Architecture – REST and Systems of Systems – Web Services – Publish-Subscribe Model – Basics of Virtualization – Types of Virtualization – Implementation Levels of Virtualization – Virtualization Structures – Tools and Mechanisms – Virtualization of CPU – Memory – I/O Devices – Virtualization Support and Disaster Recovery.

Topic - 3 CLOUD ARCHITECTURE, SERVICES AND STORAGE 6

Layered Cloud Architecture Design – NIST Cloud Computing Reference Architecture – Public, Private and Hybrid Clouds - laaS – PaaS – SaaS – Architectural Design Challenges – Cloud Storage – Storage-as-a-Service – Advantages of Cloud Storage – Cloud Storage Providers – S3.

Topic - 4 RESOURCE MANAGEMENT AND SECURITY IN CLOUD 6

Inter Cloud Resource Management – Resource Provisioning and Resource Provisioning Methods – Global Exchange of Cloud Resources – Security Overview – Cloud Security Challenges – Software-asa-Service Security – Security Governance – Virtual Machine Security – IAM – Security Standards.

Topic - 5 CLOUD TECHNOLOGIES AND ADVANCEMENTS 6

Hadoop – Map Reduce – Virtual Box -- Google App Engine – Programming Environment for Google App Engine — Open Stack – Federation in the Cloud – Four Levels of Federation – Federated Services and Applications – Future of Federation.

| | LIST OF EXPERIMENTS |
|---|---|
| 1 | Install Virtualbox/VMware Workstation with different flavours of linux or windows OS on top of windows7 or 8. |
| 2 | Install a C compiler in the virtual machine created using virtual box and execute Simple Programs |
| 3 | Install Google App Engine. |
| 4 | Use GAE to Create hello world app and other simple web applications using python/java. |
| 5 | Use GAE launcher to launch the web applications. |

| 6 | Simu | Simulate a cloud scenario using CloudSim | | | | | | | | | |
|------|---|---|--|----------|---|--|-----------|----|--|-------|----|
| 7 | Simu | Simulate a cloud scenario and run a scheduling algorithm that is not present in CloudSim. | | | | | | | | | |
| 8 | Find | Find a procedure to transfer the files from one virtual machine to another virtual machine. | | | | | | | | | |
| 9 | Insta | Install Openstack | | | | | | | | | |
| 10 | Find a procedure to launch virtual machine using trystack (Online Openstack Demo Version) | | | | | | | | | | |
| 11 | Install Hadoop single node cluster | | | | | | | | | | |
| 12 | 2 Use Hadoop to run simple applications like word count. | | | | | | | | | | |

| COURSE CONTENT | | | | | | | |
|----------------|--------------|---|--|--|--|--|--|
| Topic - 1 | INTRODUCTION | 6 | | | | | |

Intelligent Agents - Agents and environments - The foundations of AI - The History of AI- Intelligent agents-Agent based system Problem Solving: Searching for solution- Uninformed/Blind search - Informed/ Heuristic search - A* search. Knowledge Representation And Reasoning: Logics – First order logic, Inference in first order logic, Knowledge representation Planning: The planning problem - Planning with state space search - Planning and acting in the real world.

Topic - 2 MACHINE LEARNING 6

The Fundamentals of Machine Learning - The Machine Learning Landscape - Main Challenges of Machine Learning - End-to-End Machine Learning Project Working with Real Data - Discover and Visualize the Data to Gain Insights - Prepare the Data for Machine Learning Algorithms

Topic - 3 CLASSIFICATION & PLANNING 6

Classification - Training a Binary Classifier - Performance Measures - Multiclass Classification - Training Models - Linear Regression - Gradient Descent - Polynomial Regression - Regularized Linear Models, Planning with state space search - Partial order planning - Planning graphs

Topic - 4 VECTOR MACHINES & DECISION TREE 6

Support Vector Machines - Linear SVM Classification - Nonlinear SVM Classification - SVM Regression - Decision Trees - Training and Visualizing a Decision Tree - Making Predictions - The CART Training Algorithm - Regularization Hyper parameters

Topic - 5 LEARNING AND RANDOM FORESTS 6

Voting Classifiers - Bagging and Pasting- Random Patches and Random Subspaces - Random Forests - Boosting - Dimensionality Reduction - PCA - Kernel PCA - Up and Running with Tensor Flow - Distributing Tensor, Flow Across Devices and Servers

|-----|---|--------------|
| | After Successful completion of the course, the students should be able to | RBT Level |
| CO1 | State the aim and develop the procedure to conduct the experiment / exercise in the Intelligent Systems Laboratory Course | К3 |
| CO2 | Demonstrate skills at the level of precision (reliably, quickly, smoothly, and accurately with negligible guidance) in performing the experiment / exercise | К3 |
| CO3 | Draw inferences from the experiment / exercise conducted and present it professionally | K4 |
| CO4 | Demonstrate professionally the results obtained through the experiment / exercise and present conclusions | K4 |
| CO5 | Demonstrate an understanding of the concepts, procedures, and applications through verbal and written communication | К3 |
| CO6 | Demonstrating an attitude at the level of valuing (attaching values and expressing personal opinions by showing some definite involvement and commitment) | К3 |

|-------|-----|-----|-------|

Topic - 1 OVERVIEW OF JAVA

9

Concepts of Object Oriented Programming – An Overview of Java – Data types, Variables and Arrays – Operators – Control statements – Classes – Methods.

Topic - 2

INHERITANCE AND EXCEPTION HANDLING

9

Inheritance: Basics – Super keyword – Method Overriding – Dynamic Method dispatch – Abstract classes – final keyword. Packages and Interfaces: Packages – Access protection – Importing Packages – Interfaces - Exception Handling

Topic - 3

STRING HANDLING AND I/O

9

Multithreading - String Handling: String Constructors - Special String Operations - Character Extraction - String comparison - Searching and Modifying a String - String Buffer - String Tokenizer. Input/Output: The Stream Classes - The Byte Streams - The Character Streams - Serialization..

Topic - 4

COLLECTIONS

9

Collections: List – Array List – Set – Hash Set – Tree Set- Queue – Priority Queue - Map – Hash Map – Iterator – Enumerator- Wrapper Classes- Auto boxing and Un boxing- Regular Expressions.

Topic - 5

STREAM API AND JDBC

9

Lambda Expression – Lambda Parameters - Functional Interfaces - Creating Thread- Stream API – Creating Java streams - Intermediate Operations: map – filter – sort – Terminal Operations: Collect – reduce – for each - try with resources. Java Database Connectivity - Manipulating Databases with JDBC.

Topic - 1 OPERATING SYSTEMS AND PROCESS MANAGEMENT

9

Operating System Overview: Objectives and Functions – Evolution of Operating Systems – Computer Organization – Operating System Operations – Services – System Calls – System Programs – Operating System Structure – OS Generation – System Boot. Processes: Process concept – Process scheduling – Operations on processes – Inter process communication – Threads: Overview – Multicore Programming – Multithreading Models. Case Study: Linux Process and Thread Managements.

Topic - 2

PROCESS SCHEDULING AND SYNCHRONIZATION

9

CPU Scheduling: Concepts – Scheduling criteria – Scheduling algorithms. Process Synchronization: The critical section problem – Synchronization hardware – Semaphores – Classic problems of synchronization – Monitors. Deadlocks: System model – Deadlock characterization – Methods for handling deadlocks – Deadlock prevention – Deadlock avoidance – Deadlock detection – Recovery from deadlock. Case Study: Linux Scheduling

Topic - 3 MEMORY MANAGEMENT

9

Main Memory: Background – Swapping – Contiguous memory allocation – Paging – Segmentation. Virtual Memory: Background – Demand paging – Page replacement – Allocation of frames – Thrashing. Case Study: Linux Memory Management.

Topic - 4 FILE SYSTEMS

9

File-System Interface: File concept – Access methods – Directory and disk structure – File-system mounting – Sharing and Protection. File-System Implementation: Structure and Implementation – Directory implementation – Allocation methods – Free-space management. Case Study: Linux Virtual File System.

Topic - 5 I/O SYSTEMS

9

I/O Systems: I/O Hardware - Mass Storage Structure: Overview, Disk Structure and Attachment - Disk Scheduling and Management - Swap-space management - RAID. Mobile OS:iOS and Android - Architecture and SDK Framework, Media Layer, Services Layer, Core OS Layer, File System.

Topic - 1 UNDERSTANDING CLOUD COMPUTING

9

Origins and Influences-Basic Concepts and Terminology – Goals and Benefits-Risks and Challenges- Roles and Boundaries- Cloud Characteristics-Cloud Delivery Models: IaaS, PaaS, SaaS – Cloud Deployment Models: Public, Private, Community, Hybrid Clouds.

Topic - 2

CLOUD ENABLING TECHNOLOGY

9

Data Center Technology – Virtualization Technology – Web Technology – Multitenant Technology – Service Technology – Case study: VM installation and deployment.

Topic - 3

CLOUD COMPUTING MECHANISM

9

Cloud Infrastructure Mechanism: Cloud Storage, Cloud Usage Monitor, Resource Replication – Specialized Cloud Mechanism: Load Balancer, SLA Monitor, Pay-per-use Monitor, Audit Monitor, Failover System, Hypervisor, Resource Cluster, Multi Device Broker, State Management Database – Cloud Management Mechanism: Remote Administration System, Resource Management System, SLA Management System, Billing Management System.

Topic - 4

CLOUD COMPUTING ARCHITECTURE

9

Basic Terms and Concepts – Threat Agents – Cloud Security Threats – Cloud Security Mechanism: Encryption, Hashing, Digital Signature, Public Key Infrastructure, Identity and Access Management, Single Sign-on, Cloud Based Security Groups, Hardened Virtual Server Images – Case study examples

Topic - 5

SECURITY IN THE CLOUD

9

Lambda Expression – Lambda Parameters - Functional Interfaces - Creating Thread- Stream API – Creating Java streams - Intermediate Operations: map – filter – sort – Terminal Operations: Collect – reduce – foreach - try with resources. Java Database Connectivity - Manipulating Databases with JDBC.

Topic - 1 INTELLIGENT AGENTS

9

Introduction- What is AI-Why AI? -Foundation of AI- History of AI- Intelligent Agents: Agents and Environments - Characteristics-Structure of Agents. Problem formulation-Production systems-Problem characteristics-Production system characteristics- Constraints Satisfaction Problems.

Topic - 2 PROBLEM SOLVING METHODS

9

Search Strategies- Uninformed Search strategies: BFS-Uniform-cost search-DFS-Iterative Deepening DFS Bidirectional Search. Informed Search strategies: Greedy BFS-A* search—Local Search Algorithms and Optimization Problems.

Topic - 3

KNOWLEDGE REPRESENTATION

9

Knowledge Representation -Using Predicate logic :Representing simple facts-Representing instance and ISA re relationships-Computable functions and predicates- Resolution – Forward chaining - Backward chaining.

Topic - 4

UNCERTAINITY AND PROBABLISTIC REASONING

9

Uncertainty: Acting under Uncertainty-Inference using Full Joint Distributions -Bayes' rule. Probabilistic Reasoning: Semantics of Bayesian networks-Exact Inference- Dempster- Shafer theory-Fuzzy set and fuzzy logic

Topic - 5 AI APPLICATIONS

9

45

Natural Language Processing: Information Retrieval- Information Extraction—Speech Recognition .Robotics : Hardware – Perception – Planning – Moving.

Topic - 1

FUNDAMENTALS OF BIG DATA

9

Understanding Big Data: Concepts and Terminology, Big Data Characteristics, Different Types of Data – Big Data Analytics Lifecycle - Enterprise Technologies and Big Data Business Intelligence. Case Study: Identifying data characteristics and types of data.

Topic - 2

STORING AND PROCESSING BIG DATA

9

Big Data Storage Concepts: Clusters, File Systems and Distributed File Systems, NoSQL, Sharding, Replication, CAP Theorem, ACID, BASE - Big Data Processing Concepts: Parallel Data Processing, Distributed Data Processing, Hadoop, Processing Workloads, Cluster, Processing in Batch Mode, Processing in Realtime Mode - Big Data Storage Technology: On-Disk Storage Devices, In-Memory Storage Devices.

Topic - 3

BIG DATA ANALYSIS

9

Quantitative Analysis – Qualitative Analysis – Data Mining – Statistical Analysis – Machine Learning – Semantic Analysis – Visual Analysis – Case Study : Correlation – Regression – Time Series Plot – Clustering – Classification.

Topic - 4

ANALYTICS MODELS - PREDICTIVE MODELING

9

Introduction – Data Models – Computing Models. Predictive Modeling for Unstructured Data: Introduction – Applications of Predictive Modeling – Featured Engineering – Pattern Mining.

Topic - 5

APPLICATIONS FOR BIG DATA ANALYTICS

9

Big Data Analytics for Financial Services and Banking: Introduction – Customer insights and marketing analysis – Sentiment Analysis – Predictive Analytics – Model Building – Fraud detection and Risk Management – Integration of Big Data Analytics into operations. Big Data Analytics and Recommender Systems: Introduction – Background – Overview – Evaluations of Recommenders – Issues.
