

# **AL-AMEEN ENGINEERING COLLEGE**

**(Autonomous)**

Accredited by NAAC with "A" Grade :: An ISO Certified Institution  
(Affiliated to Anna University, Chennai & Approved by AICTE, New Delhi)  
Karundevanpalayam, NanjaiUthukkuli Post, Erode – 638 104, Tamilnadu, INDIA.

## **CURRICULUM & SYLLABI** **SEMESTERS – I to VIII** **(Regulations 2020)**

### **CHOICE BASED CREDIT SYSTEM** **B.E. CIVIL ENGINEERING**

Applicable to the Students admitted from the AY 2021-22 onwards

## KNOWLEDGE LEVELS (BLOOM'S TAXONOMY)

| Notation | Knowledge Levels |
|----------|------------------|
| K1       | Remembering      |
| K2       | Understanding    |
| K3       | Applying         |
| K4       | Analysing        |
| K5       | Evaluating       |
| K6       | Creating         |

### **INSTITUTION VISION**

To be a multi-disciplinary institute of academic excellence in Engineering, Technology and allied fields for uplifting the under-privileged and rural; inculcating brotherhood and positivism among its students.

### **INSTITUTION MISSION**

To groom confident, wholesome students with social consciousness and values, by endeavoring experiences for the ever-changing world of work.

### **DEPARTMENT VISION**

To establish an outstanding centre of regional and national reputation for providing a quality engineering education to the students from the rural areas, excellent services to the professional and the community; to produce quality civil engineers; and to employ principles of continual quality improvement to enhance its programme and faculty.

### **DEPARTMENT MISSION**

|    |   |
|----|---|
| M1 | To serve the people and the country by providing a broad and high-quality education to its student for a successful professional career.        |
| M2 | To conduct strong basic for national needs.   |
| M3 | To serve the construction industry; civil engineering profession and rural community through dissemination of knowledge and technical services. |

### **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

|              |  |
|--------------|--|
| <b>PEO 1</b> | To train the students so that they can work and contribute to the infrastructure development projects being undertaken by Govt. and private or any other sector companies.                                     |
| <b>PEO 2</b> | To train students in such a way that they can pursue higher studies so that they can contribute to the teaching profession / research and development of civil engineering and other allied fields.            |
| <b>PEO 3</b> | To train students in a manner that they should function effectively in the multicultural and multidisciplinary groups for the sustainable development and growth of civil engineering projects and profession. |

| <b>PROGRAM OUTCOMES (POs)</b> |  |
|-------------------------------|--|
| <b>PO 1</b>                   | <b>Engineering Knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.  |
| <b>PO 2</b>                   | <b>Problem Analysis:</b> Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.   |
| <b>PO 3</b>                   | <b>Design/Development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.         |
| <b>PO 4</b>                   | <b>Conduct Investigations of Complex Problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.  |
| <b>PO 5</b>                   | <b>Modern Tool Usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.   |
| <b>PO 6</b>                   | <b>The Engineer and Society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.   |
| <b>PO 7</b>                   | <b>Environment and Sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.   |
| <b>PO 8</b>                   | <b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.  |
| <b>PO 9</b>                   | <b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.   |
| <b>PO 10</b>                  | <b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| <b>PO 11</b>                  | <b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.   |
| <b>PO 12</b>                  | <b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change  |

| <b>PROGRAM SPECIFIC OUTCOMES (PSOs)</b> |  |
|---|--|
| <b>PSO 1</b>                            | Apply interdisciplinary engineering knowledge and skills, specifically for integrated infrastructural systems in order to fit into socially acceptable, economically viable, aesthetically appealing and technically feasible Civil engineering systems. |
| <b>PSO 2</b>                            | Designing, detailing, constructing and maintaining environmentally sustainable systems promoting locally available materials and labour, preserving the regional and national culture.   |

### COURSE LEARNING OUTCOMES (COs)

| After Successful completion of the course, the students should be able to |  | RBT Level | Topics Covered |
|---|--|-----------|----------------|
| CO1   | Identify Eigen values and Eigenvectors and apply orthogonal diagonalization to convert quadratic form to canonical form.               | K3        | 1              |
| CO2   | Apply differentiation and integration technique to solve algebraic and transcendental function   | K3        | 2              |
| CO3   | Evaluate the total derivative of the function, expand the given as series and locate the maximum and minimum for multivariate function | K5        | 3              |
| CO4   | Solve first order Ordinary Differential Equations and apply them to certain physical situations  | K3        | 4              |
| CO5   | Choose appropriate integral techniques to find area and volume of the given region   | K5        | 5              |

### PRE-REQUISITE

NIL

### COURSE ASSESSMENT METHODS

|                 |   |                             |
|-----------------|---|-----------------------------|
| <b>DIRECT</b>   | 1 | Continuous Assessment Tests |
|                 | 2 | Assignments and Tutorials   |
|                 | 3 | End Semester Examinations   |
| <b>INDIRECT</b> | 1 | Course Exit Survey          |

| COURSE CONTENT  |   |  |                 |           |  |                  |          |  |              |           |
|---|---|--|-----------------|-----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>  | <b>MATRICES</b>                                   |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Eigen values and Eigen vectors of a real matrix – properties of Eigen values and Eigen vectors (without proof) – Cayley-Hamilton theorem (statement and applications) – orthogonal transformation of a symmetric matrix to diagonal form (concept only) – Reduction of quadratic form to canonical form by an orthogonal transformation |   |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 2</b>  | <b>DIFFERENTIATION AND INTEGRATION</b>            |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Basic differentiation formula for algebraic and transcendental functions – derivatives – differentiability rules and properties (without proof) – basic integral formula for algebraic and transcendental functions – integration by parts – partial fraction methods.  |   |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 3</b>  | <b>FUNCTIONS OF SEVERAL VARIABLES</b>             |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Total derivatives – Taylor’s series expansion – maxima and minima – Lagrange’s multipliers method – Jacobian’s method   |   |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 4</b>  | <b>FIRST ORDER ORDINARY DIFFERENTIAL EQUATION</b> |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Leibnitz’s equations – Bernoulli’s equation – equation of first order and higher degree – Clairaut’s form – Linear first order differential equations and its applications.   |   |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 5</b>  | <b>MULTIPLE INTEGRALS</b>                         |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Double integrals: Double integration in Cartesian co-ordinates – change of order of integration – area as a double integration in Cartesian – volume as a triple integral in Cartesian co-ordinates (simple problems)   |   |  |                 |           |  |                  |          |  |              |           |
| <b>THEORY</b>   | <b>45</b>   |  | <b>TUTORIAL</b> | <b>15</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>60</b> |

|--|-------------------------------|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>WATER CHEMISTRY</b>        |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Hardness of water – types – units –boiler troubles (scale and sludge) – treatment of boiler feed water – Internal treatment (phosphate, colloidal, carbonate and calgon conditioning) external treatment – Ion exchange process, zeolite process – desalination of brackish water – Reverse Osmosis.                               |                               |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>FUELS AND COMBUSTION</b>   |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Fuels: Introduction - classification of fuels – Combustion- coal – Analysis of coal - carbonization - manufacture of metallurgical coke (Otto Hoffmann method) - petroleum - knocking - octane number - diesel oil - cetane number - natural gas - compressed natural gas (CNG) - liquefied petroleum gases (LPG) - power alcohol. |                               |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>ENERGY STORAGE DEVICES</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Batteries - Types of batteries – primary battery - dry cell. Secondary battery - lead acid battery, Nickel- Cadmium battery, fuel cells – Hydrogen -Oxygen fuel cell. - Solar energy conversion - solar cells – Application.   |                               |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>SPECTROSCOPY</b>           |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Introduction – Laws of spectroscopy - Block diagram, Instrumentation, Working and application of Visible spectroscopy and Ultra Violet spectroscopy – Infrared spectroscopy – Flame photometry – Atomic adsorption spectroscopy.   |                               |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>ENGINEERING MATERIALS</b>  |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Polymer – Types of polymerization – Preparation, properties, uses of Nylon(6,6), Poly Vinyl Chloride (PVC). Plastics – Types - Rubbers – SBR – Nanomaterial – Synthesis and its applications of Nanomaterial. Abrasives – Classification, Properties- Manufacture of SiC.  |                               |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>                     |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

## COURSE CONTENT

| COURSE CONTENT  |                               |  |                 |           |  |                  |          |  |              |           |
|---|-------------------------------|--|-----------------|-----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>  | <b>GRAMMAR AND VOCABULARY</b> |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Word formation with Prefix and Suffix – Parts of Speech – Tenses - Voices – Degrees of comparison –Compound Nouns - Basic Vocabulary – Homonyms and Homophones – Articles- Idioms – Phrasal verbs – Subject-Verb Agreement.   |                               |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 2</b>  | <b>LISTENING</b>              |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Introduction to Listening – Listening Comprehension – Extensive and Intensive listening – Pronunciation – Intonation – Stress – Pause – Rhythm – Short and Long conversations.  |                               |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 3</b>  | <b>SPEAKING</b>               |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| An introduction to Speech sounds – Verbal and Non-verbal Communication – Describing places, people, Technical Processes – Telephonic skills – Different types of Interview – Group Discussions – Debates.   |                               |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 4</b>  | <b>READING</b>                |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Skimming and Scanning – Reading Newspaper articles – Reading different types of texts – SpeedReading – Reading to identify Stylistic Features (Syntax, Lexis, Sentence Structures) – Comprehension.   |                               |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 5</b>  | <b>WRITING</b>                |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Introduction to aspects of technical writing – Letter writing – Formal Letters – Job application letter with CV and Resume - Official letters- Business letters- Circular letters- Employment letters – Punctuation – Writing reviews on books and movies – recommendations – Creative writing – email writing. |                               |  |                 |           |  |                  |          |  |              |           |
| <b>THEORY</b>   | <b>45</b>                     |  | <b>TUTORIAL</b> | <b>15</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>60</b> |

### COURSE LEARNING OUTCOMES (COs)

| After Successful completion of the course, the students should be able to |   | RBT Level |
|---|---|-----------|
| CO1   | State the aim and develop the procedure to conduct the experiment / exercise in the Physics & Chemistry laboratory Course                                   | K3        |
| CO2   | Demonstrate skills at the level of precision (reliably, quickly, smoothly, and accurately with negligible guidance) in performing the experiment / exercise | K3        |
| CO3   | Draw inferences from the experiment / exercise conducted and present it professionally  | K4        |
| CO4   | Demonstrate professionally the results obtained through the experiment / exercise and present conclusions   | K4        |
| CO5   | Demonstrate an understanding of the concepts, procedures, and applications through verbal and written communication   | K3        |
| CO6   | Demonstrating an attitude at the level of valuing (attaching values and expressing personal opinions by showing some definite involvement and commitment)   | K3        |

|                      |            |

### COURSE LEARNING OUTCOMES (COs)

| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
|---|---|--|-----------|----------------|
| CO1   | Solve higher order differential equations and apply them to certain physical situations   |  | K3        | 1              |
| CO2   | Apply various integral theorems for solving engineering problems involving cubes and parallelepipeds.   |  | K3        | 2              |
| CO3   | Solve linear differential equations using Laplace transform techniques.   |  | K3        | 3              |
| CO4   | Construct analytic function of complex variables and transform functions from z- plane to w- plane and vice-versa using conformal mappings. . |  | K3        | 4              |
| CO5   | Apply the techniques of complex integration to evaluate real and complex integrals over suitable closed paths or contours                     |  | K3        | 5              |

### COURSE LEARNING OUTCOMES (COs)

| After Successful completion of the course, the students should be able to |  |  | RBT Level | Topics Covered |
|---|--|--|-----------|----------------|
| CO1   | Analyze the relevance of Engineering Geology in Civil Engineering.   |  | K4        | 1              |
| CO2   | Understand the common rock forming minerals and common rocks based on their physical properties.   |  | K2        | 2              |
| CO3   | Evaluate the earthquakes in relation to internal structure of the earth  |  | K5        | 3              |
| CO4   | Understand processes and geological agents involved in the shaping surface of the earth and explain the internal structure of the Earth. |  | K2        | 4              |
| CO5   | Understand the hazards due to volcanic and seismic activity.   |  | K2        | 5              |

| <b>Topic - 1</b>   | <b>BASIC LAWS AND FORCE SYSTEMS</b>                      |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Introduction to mechanics - Law of Mechanics – Lami’s Theorem, Parallelogram, triangular and polygon law of forces – Principles of transmissibility – Force system – resultant force, composition of force, resolution of forces |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>STATICS OF PARTICLES</b>                              |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Free body diagram - Force on a particle – resultant of two forces and several concurrent forces – resolution of a force – equilibrium of a particle  |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>STATICS OF RIGID BODIES</b>                           |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Equilibrium of rigid bodies– transmissibility – moment of a force – varignon’s theorem– Simplification of forces and couple system – Beams – types of loads , supports and their reactions                                       |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>CENTROID, CENTRE OF GRAVITY AND MOMENT OF INERTIA</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Centroids of areas, composite areas, determination of moment of inertia of plane figures, polar moment of inertia-radius of gyration – mass moment of inertia of simple solids   |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>FRICTION</b>  |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Laws of friction – angles of friction- coefficient of friction - angle of repose - wedges Ladder.  |  |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>  |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Identify the drawing instruments effectively and able to dimension the figure.              |  | K1        | 1              |
| CO2   | Appraise the usage of engineering curves in tracing the path of simple machine components.  |  | K4        | 2              |
| CO3   | Interpret the concept of projection and acquire visualization skills, projection of points. |  | K3        | 3              |
| CO4   | Construct the basic views related to projections of lines, planes.                          |  | K2        | LAB            |
| CO5   | Plan to use the modern tool for drawing communication.                                      |  | K4        |                |
| CO6   | Express the symbolic representation as per BIS SP:4 -2003.                                  |  | K4        |                |

| COURSE LEARNING OUTCOMES (COs)  |   |           |
|---|---|-----------|
| After Successful completion of the course, the students should be able to |   | RBT Level |
| CO1   | State the aim and develop the procedure to conduct the experiment / exercise in the Communication Skills Laboratory Course                                  | K3        |
| CO2   | Demonstrate skills at the level of precision (reliably, quickly, smoothly, and accurately with negligible guidance) in performing the experiment / exercise | K3        |
| CO3   | Draw inferences from the experiment / exercise conducted and present it professionally  | K4        |
| CO4   | Demonstrate professionally the results obtained through the experiment / exercise and present conclusions   | K4        |
| CO5   | Demonstrate an understanding of the concepts, procedures, and applications through verbal and written communication   | K3        |
| CO6   | Demonstrating an attitude at the level of valuing (attaching values and expressing personal opinions by showing some definite involvement and commitment)   | K3        |

|                      |                                |

|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Demonstrate the importance of interdisciplinary nature of environment and health risk assessment.   |  | K2        | 1              |
| CO2   | Discuss the ecosystem and their importance in the environment and conservation of biodiversity.   |  | K2        | 2              |
| CO3   | Design the rain water harvesting system in their living area.   |  | K6        | 3              |
| CO4   | Analyze the impact of pollution and hazardous waste in a global and societal context.   |  | K4        | 4              |
| CO5   | Understand contemporary issues that result in environmental degradation that would attempt to provide solutions to overcome the problems. |  | K3        | 5              |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Relate and apply the concept of probability and random variables and predict probabilities of events in models following normal distribution. |  | K3        | 1              |
| CO2   | Identify the types of correlation, correlation between variables, and predict unknown values using regression.                                |  | K3        | 2              |
| CO3   | Justify the concept of testing of hypothesis for small and large samples and interpret the results.   |  | K5        | 3              |
| CO4   | Classify the principles of design of experiments and perform analysis of variance.  |  | K2        | 4              |
| CO5   | Sketch control charts and criticize on the process control.   |  | K5        | 5              |

|                      |            |

| <b>Topic - 1</b>  | <b>STRESS AND STRAIN</b>                  |  |                 |          |  |                  |          |  |              | <b>9</b>  |
| Stress and strain at a point – Tension, Compression, Shear Stress – Hooke's Law – Relationship among elastic constants – Stress Strain Diagram for Mild Steel, TOR steel, Concrete – Ultimate Stress – Yield Stress – Factor of Safety – Thermal Stresses – Thin Cylinders and Shells – Strain Energy due to Axial Force – Resilience – Stresses due to impact and Suddenly Applied Load.                     |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>  | <b>SHEAR AND BENDING IN BEAMS</b>         |  |                 |          |  |                  |          |  |              | <b>9</b>  |
| Beams and Bending- Types of loads, supports – Shear Force and Bending Moment Diagrams for statically determinate beam with concentrated load, UDL, uniformly varying load. Theory of Simple Bending – Analysis of Beams for Stresses – Stress Distribution at a cross Section due to bending moment and shear force for Cantilever, simply supported and overhanging beams with different loading conditions. |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>  | <b>DEFLECTION</b>                         |  |                 |          |  |                  |          |  |              | <b>9</b>  |
| Double integration method - Macaulay's methods - Area moment method for computation of slopes and deflections of determinant beams.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>  | <b>TORSION</b>                            |  |                 |          |  |                  |          |  |              | <b>9</b>  |
| Torsion of Circular and Hollow Shafts – Elastic Theory of Torsion – Stresses and Deflection in Circular Solid and Hollow Shafts – combined bending moment and torsion of shafts - strain energy due to torsion - Modulus of Rupture – Power transmitted to shaft – Shaft in series and parallel – Closed and Open Coiled helical springs – Leaf Springs – Springs in series and parallel.                     |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>  | <b>COMPLEX STRESSES AND PLANE TRUSSES</b> |  |                 |          |  |                  |          |  |              | <b>9</b>  |
| 2 D State of Stress – 2 D Normal and Shear Stresses on any plane – Principal Stresses and Principal Planes – Mohr's circle - Plane trusses: Analysis of plane trusses - method of joints.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>   | <b>45</b>                                 |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

**COURSE LEARNING OUTCOMES (COs)**

| After Successful completion of the course, the students should be able to |   | RBT Level |
|---|---|-----------|
| <b>CO1</b>  | State the aim and develop the procedure to conduct the experiment / exercise in the Surveying Laboratory Course   | K3        |
| <b>CO2</b>  | Demonstrate skills at the level of precision (reliably, quickly, smoothly, and accurately with negligible guidance) in performing the experiment / exercise | K3        |
| <b>CO3</b>  | Draw inferences from the experiment / exercise conducted and present it professionally  | K4        |
| <b>CO4</b>  | Demonstrate professionally the results obtained through the experiment / exercise and present conclusions   | K4        |
| <b>CO5</b>  | Demonstrate an understanding of the concepts, procedures, and applications through verbal and written communication   | K3        |
| <b>CO6</b>  | Demonstrating an attitude at the level of valuing (attaching values and expressing personal opinions by showing some definite involvement and commitment)   | K3        |

|                      |                  |

| <b>COURSE CONTENT</b>  |  |          |
|--|--|----------|
| <b>Topic - 1</b>   | <b>Course Introduction - Need, Basic Guidelines, Content and Process for Value Education</b> | <b>9</b> |
| <ol style="list-style-type: none"> <li>1. Purpose and motivation for the course, recapitulation from Universal Human Values-I</li> <li>2. Self-Exploration–what is it? - Its content and process; ‘Natural Acceptance’ and Experiential Validation- as the process for self-exploration</li> <li>3. Continuous Happiness and Prosperity- A look at basic Human Aspirations</li> <li>4. Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority</li> <li>5. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario</li> <li>6. Method to fulfil the above human aspirations: understanding and living in harmony at various levels.</li> </ol>   |  |          |
| <b>Topic - 2</b>   | <b>Understanding Harmony in the Human Being - Harmony in Myself!</b>                         | <b>9</b> |
| <ol style="list-style-type: none"> <li>7. Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’</li> <li>8. Understanding the needs of Self (‘I’) and ‘Body’ - happiness and physical facility</li> <li>9. Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer)</li> <li>10. Understanding the characteristics and activities of ‘I’ and harmony in ‘I’</li> <li>11. Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail</li> <li>12. Programs to ensure Sanyam and Health.</li> </ol>  |  |          |
| <b>Topic - 3</b>   | <b>Understanding Harmony in the Family and Society- Harmony in Human Relationship</b>        | <b>9</b> |
| <ol style="list-style-type: none"> <li>13. Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship</li> <li>14. Understanding the meaning of Trust; Difference between intention and competence</li> <li>15. Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship</li> <li>16. Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals</li> <li>17. Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family.</li> </ol> |  |          |
| <b>Topic - 4</b>   | <b>Understanding Harmony in the Nature and Existence - Whole existence as Coexistence</b>    | <b>9</b> |
| <ol style="list-style-type: none"> <li>18. Understanding the harmony in the Nature</li> <li>19. Interconnectedness and mutual fulfilment among the four orders of nature recyclability and self regulation in nature</li> <li>20. Understanding Existence as Co-existence of mutually interacting units in all pervasive space</li> </ol>  |  |          |

|  |   |  |                 |          |  |                  |          |  |              |           |
|--|---|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| 21. Holistic perception of harmony at all levels of existence.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>Implications of the above Holistic Understanding of Harmony on Professional Ethics</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| 22. Natural acceptance of human values   |   |  |                 |          |  |                  |          |  |              |           |
| 23. Definitiveness of Ethical Human Conduct  |   |  |                 |          |  |                  |          |  |              |           |
| 24. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order   |   |  |                 |          |  |                  |          |  |              |           |
| 25. Competence in professional ethics: a. Ability to utilize the professional competence for augmenting universal human order b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems, c. Ability to identify and develop appropriate technologies and management patterns for above production systems. |   |  |                 |          |  |                  |          |  |              |           |
| 26. Case studies of typical holistic technologies, management models and production systems  |   |  |                 |          |  |                  |          |  |              |           |
| 27. Strategy for transition from the present state to Universal Human Order: a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers b. At the level of society: as mutually enriching institutions and organizations  |   |  |                 |          |  |                  |          |  |              |           |
| 28. Sum up   |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>   |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| COURSE LEARNING OUTCOMES (COs)  |  |  |           |                |
|---|--|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |  |  | RBT Level | Topics Covered |
| CO1   | Understand the different types of flows and channels.          |  | K2        | 1              |
| CO2   | Understand gradually varied flow profile in detail.            |  | K2        | 2              |
| CO3   | Understand rapidly varied flow profile in detail.              |  | K2        | 3              |
| CO4   | Analyse the various components of pumps, efficiency and speed. |  | K4        | 4              |
| CO5   | Evaluate the working proportions of hydraulic turbines.        |  | K5        | 5              |

|                      |                        |
|----------------------|------------------------|
| <b>PRE-REQUISITE</b> | <b>Fluid Mechanics</b> |
|----------------------|------------------------|

|--|------------------------------|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>OPEN CHANNEL FLOW</b>     |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Definition and differences between pipe flow and open channel flow - Types of Flow - Properties of open channel - Fundamental equations - Velocity distribution in open channel - Steady uniform flow: Chezy equation, Manningequation - Best hydraulic sections for uniform flow - Computation in Uniform Flow - Specific energy and specificforce - Critical depth and velocity. |                              |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>GRADUALLY VARIED FLOW</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Dynamic equations of gradually varied and spatially varied flows - Water surface flow profile classifications: Hydraulic Slope, Hydraulic Curve - Profile determination by Numerical method: Direct step method and Standardstep method, Graphical method – Applications.  |                              |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>RAPIDLY VARIED FLOW</b>   |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Application of the energy equation for RVF - Critical depth and velocity - Critical, Sub-critical and Super-critical flow - Application of the momentum equation for RVF - Hydraulic jumps - Types - Energy dissipation - Surges and surge through channel transitions.  |                              |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>PUMPS</b>                 |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Application of momentum principle - Classification of pumps - Centrifugal pump - Minimum speed to start the pump - Multistage pumps - Reciprocating pump - Negative slip - Air vessels - Indicator diagrams.   |                              |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>TURBINES</b>              |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Impact of Jet on vanes - Turbines - Classification - Reaction turbines - Francis turbine, Radial flow turbines, draft tube and cavitation - Propeller and Kaplan turbines - Impulse turbine - Performance of turbine - Specific speed - Runaway speed - Similarity laws.   |                              |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>                    |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| Semester | Programme  | Course Code | Course Name         | L | T | P | C |
|----------|------------|-------------|---------------------|---|---|---|---|
| IV       | B.E. CIVIL | 20CE4T3     | CONCRETE TECHNOLOGY | 3 | 0 | 0 | 3 |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Understand the concept of building materials – Cement, Aggregate and Water. |  | K2        | 1              |
| CO2   | Analyze the suitable Admixtures used in concrete.                           |  | K4        | 2              |
| CO3   | Analyse the suitable mix design of concrete grade.                          |  | K4        | 3              |
| CO4   | Evaluate the fresh and hardened concrete.                                   |  | K5        | 4              |
| CO5   | Analyze the different types of special concrete.                            |  | K4        | 5              |

|                      |   |
|----------------------|---|
| <b>PRE-REQUISITE</b> | <b>CIVIL ENGINEERING MATERIALS-I , CIVIL ENGINEERING MATERIALS-II</b> |
|----------------------|---|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Identify and apply various numerical techniques for solving non-linear equations and systems of linear equations.   |  | K3        | 1              |
| CO2   | Categorize various types of interpolation with equal and unequal intervals and apply the concept of cubic spline, approximation of derivatives using interpolation polynomials. |  | K4        | 2              |
| CO3   | Analyse and apply the knowledge of interpolation and determine the integration and differentiation of the functions by using the numerical data.                                |  | K4        | 3              |
| CO4   | Determine the dynamic behaviour of the system through solution of ordinary differential equations by using numerical methods.   |  | K5        | 4              |
| CO5   | Solve PDE models representing spatial and temporal variations in physical systems through numerical methods.  |  | K3        | 5              |

| COURSE LEARNING OUTCOMES (COs)  |  |  |           |                |
|---|--|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |  |  | RBT Level | Topics Covered |
| CO1   | Understand the concept of road transportation and aligning of highway.                               |  | K2        | 1              |
| CO2   | Understand the geometric design of highways.   |  | K2        | 2              |
| CO3   | Analyzing preliminary design of flexible and rigid pavement.   |  | K4        | 3              |
| CO4   | Understand the methods of route alignment and design elements in Railway Planning and Constructions. |  | K2        | 4              |
| CO5   | Evaluate the requirements of railway track for high speed trains, safety aspects and maintenance.    |  | K5        | 5              |

|                      |                  |
|----------------------|------------------|
| <b>PRE-REQUISITE</b> | <b>SURVEYING</b> |
|----------------------|------------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |

| COURSE CONTENT   |   |  |                 |          |  |                  |          |  |              |           |
|--|---|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>HIGHWAY PLANNING AND ALIGNMENT</b>             |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Role of Transportation - Characteristics, merits and demerits of road transportation - Historical development of Road Construction - Highway development in India - Classification of roads - Road patterns - Highway alignment - Engineering surveys for Highway location.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>GEOMETRIC DESIGN</b>                           |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Highway cross sectional elements - Typical cross sections of Urban and Rural roads - Sight distance - Design of Horizontal alignment - horizontal curves, camber, super elevation, widening of curve.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>DESIGN OF PAVEMENTS</b>                        |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Flexible Pavements: materials – tests (CBR) - mix design - design factors - flexible pavement design as per IRC. Rigid Pavements: design of rigid pavements - general design considerations - stresses in rigid pavements - design of joints, dowel bar, tie bar - IRC method of design of concrete pavements.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>RAILWAY PLANNING AND DESIGN</b>                |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Railway track (Permanent way) its components and their functions –Gauge, tilting of rails Coning of wheels and theory of coning – Rails, Rail fastenings, Creep of rails – Sleepers – Ballasts – Ballast less tracks. Track alignment: Engineering surveys for track alignment – Obligatory points – Conventional methods –Modern methods. Geometric design of Railway Tracks: Gradient-Horizontal curve, super elevation, Transition curves, Summit Curves. |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>RAILWAY TRACK CONSTRUCTION AND MAINTENANCE</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Points and crossing-Signalling and interlocking-Stations and Equipment-Yards and equipments-Track maintenance.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>   |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Analyze the member forces and deflection of determinate structures                        |  | K4        | 1              |
| CO2   | Analyze the continuous beams and frame by slope deflection method.                        |  | K4        | 2              |
| CO3   | Analyze the continuous beams and frame by moment distribution method.                     |  | K4        | 3              |
| CO4   | Analyze the forces for continuous beams, frames and trusses using flexibility method.     |  | K4        | 4              |
| CO5   | Analyze the displacement for continuous beams, frames and trusses using stiffness method. |  | K4        | 5              |

| PRE-REQUISITE | MECHANICS OF SOLIDS-II |
|---------------|------------------------|
|---------------|------------------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |

| Semester | Programme  | Course Code | Course Name  | L | T | P | C |
|----------|------------|-------------|--|---|---|---|---|
| V        | B.E. CIVIL | 20CE5T2     | <b>DESIGN OF REINFORCED CONCRETE ELEMENTS AND STRUCTURES</b> | 3 | 1 | 0 | 4 |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| <b>CO1</b>  | Identify and explain the methods for the design of Reinforced concrete (RC) elements. |  | K2        | 1              |
| <b>CO2</b>  | Design the beams by limit state method  |  | K5        | 2              |
| <b>CO3</b>  | Design the slabs under different support condition by limit state method.             |  | K5        | 3              |
| <b>CO4</b>  | Design the columns for axial and eccentric loadings by limit state method.            |  | K5        | 4              |
| <b>CO5</b>  | Design of footing by limit state method.  |  | K5        | 5              |

|                      |                              |
|----------------------|------------------------------|
| <b>PRE-REQUISITE</b> | <b>STRENGTH OF MATERIALS</b> |
|----------------------|------------------------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |

| COURSE LEARNING OUTCOMES (COs)  |  |  |           |                |
|---|--|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |  |  | RBT Level | Topics Covered |
| CO1   | Understand the concept of Mechanical hazards.    |  | K2        | 1              |
| CO2   | Understand the concept of chemical hazards.      |  | K2        | 2              |
| CO3   | Understand the knowledge of noise pollution.     |  | K2        | 3              |
| CO4   | Understand the principal of Safety Analysis.     |  | K2        | 4              |
| CO5   | Understand the knowledge of Disaster management. |  | K2        | 5              |

|                      |            |
|----------------------|------------|
| <b>PRE-REQUISITE</b> | <b>NIL</b> |
|----------------------|------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |

| V        | B.E. CIVIL | 20CE5LT1    | GEOTECHNICAL ENGINEERING-I | 2 | 0 | 4 | 4 |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Classify the soil and assess the engineering properties, based on index properties. |  | K2        | 1              |
| CO2   | Understand the stress concepts in soils.  |  | K2        | 2              |
| CO3   | Understand and identify the settlement in soils.                                    |  | K2        | 3              |
| CO4   | Describe the shear strength of soil.  |  | K2        | 4              |
| CO5   | Demonstrate stress distribution, stress transformation and consolidation of soils.  |  | K3        | 5              |

|                      |                            |
|----------------------|----------------------------|
| <b>PRE-REQUISITE</b> | <b>ENGINEERING GEOLOGY</b> |
|----------------------|----------------------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |
|--|-----------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| COs  | Programme Learning Outcomes (POs) |     |     |     |     |     |     |     |     |      |      |      | PSOs |      |

| COURSE ASSESSMENT METHODS |   |                             |
|---------------------------|---|-----------------------------|
| <b>DIRECT</b>             | 1 | Continuous Assessment Tests |
|                           | 2 | Mini Project & Record       |
|                           | 3 | End Semester Examinations   |
| <b>INDIRECT</b>           | 1 | Course Exit Survey          |

| <b>COURSE CONTENT - THEORY</b>   |   |  |                 |          |  |                  |          |  |              |           |
|--|---|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>SOIL CLASSIFICATION AND COMPACTION</b> |  |                 |          |  |                  |          |  | <b>6</b>     |           |
| History – formation and types of soil – composition - Index properties – clay mineralogy structural arrangement of grains – description – Classification – BIS – US – phase relationship – Compaction – theory – laboratory and field technology – field Compaction method – factors influencing compaction.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>EFFECTIVE STRESS AND PERMEABILITY</b>  |  |                 |          |  |                  |          |  | <b>6</b>     |           |
| Soil - water – Static pressure in water - Effective stress concepts in soils – Capillary phenomena– – Permeability – Darcy’s law – Determination of Permeability – Laboratory Determination (Constant head and falling head methods) and field measurement pumping out in unconfined and confined aquifer – Factors influencing permeability of soils. |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>STRESS DISTRIBUTION AND SETTLEMENT</b> |  |                 |          |  |                  |          |  | <b>6</b>     |           |
| Stress distribution in homogeneous and isotropic medium – Boussines of theory – (Point load, Line load and udl) Use of New marks influence chart –Components of settlement – Immediate and consolidation settlement – Factors influencing settlement – Terzaghi’s one dimensional consolidation theory.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>SHEAR STRENGTH</b>                     |  |                 |          |  |                  |          |  | <b>6</b>     |           |
| Shear strength of cohesive and cohesion less soils – Mohr-Coulomb failure theory – shear strength - Direct shear, Triaxial compression.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>SLOPE STABILITY</b>                    |  |                 |          |  |                  |          |  | <b>6</b>     |           |
| Infinite slopes and finite slopes – Use of stability number –Guidelines for location of critical slope surface in cohesive and c - soil – Slope protection measures.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>30</b>                                 |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>30</b> |

| <b>COURSE CONTENT – LABORATORY</b> |   |
|------------------------------------|---|
| Experiment -1                      | Specific gravity of soil solids               |
| Experiment -2                      | Grain size distribution -Sieve analysis       |
| Experiment -3                      | Grain size distribution – Hydrometer analysis |
| Experiment -4                      | Liquid limit tests                            |
| Experiment -5                      | Plastic limit tests                           |
| Experiment -6                      | Shrinkage limit                               |
| Experiment -7                      | Field density Test ( Sand replacement method) |

|                 |   |  |                 |          |  |                  |           |  |              |           |
|-----------------|---|--|-----------------|----------|--|------------------|-----------|--|--------------|-----------|
| Experiment - 8  | Field density Test (core cutter method)   |  |                 |          |  |                  |           |  |              |           |
| Experiment - 9  | Determination of moisture – density relationship using Standard Proctor Compaction Test |  |                 |          |  |                  |           |  |              |           |
| Experiment - 10 | Direct shear test in cohesion less soil (Demonstration Only)                            |  |                 |          |  |                  |           |  |              |           |
| Experiment - 11 | Triaxial shear test (Demonstration only)  |  |                 |          |  |                  |           |  |              |           |
| Experiment - 12 | Three Gang Consolidation test (Demonstration only)                                      |  |                 |          |  |                  |           |  |              |           |
| Experiment - 13 | CBR Apparatus (Demonstration only)  |  |                 |          |  |                  |           |  |              |           |
| <b>THEORY</b>   | <b>0</b>  |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>60</b> |  | <b>TOTAL</b> | <b>60</b> |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Plot the ILD for Simply supported and over hanging beams subjected to moving load.                    |  | K5        | 1              |
| CO2   | Explain Muller Breslau principle and draw the influence lines for statically indeterminate beams.     |  | K5        | 2              |
| CO3   | Analyze indeterminate beams and rigid frames.   |  | K5        | 3              |
| CO4   | Identify the vertical reaction, horizontal thrust and bending moment for two and three hinged arches. |  | K5        | 4              |
| CO5   | Analyze the internal forces in the Cables and Suspension bridges.                                     |  | K5        | 5              |

|                      |                                |
|----------------------|--------------------------------|
| <b>PRE-REQUISITE</b> | <b>STRUCTURAL ANALYSIS - I</b> |
|----------------------|--------------------------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |
|--|-----------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|

| <b>INDIRECT</b>           | 1 | Course Exit Survey                        |

| <b>COURSE CONTENT</b>  |  |  |                 |           |  |                  |          |  |              |           |
|--|--|--|-----------------|-----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>INFLUENCE LINES FOR DETERMINATE BEAMS</b>   |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Construction of Influence Line Diagram (ILD) for shear force and bending moment - Calculation of critical stress resultants due to concentrated and distributed moving loads for simply supported and overhanging beams - absolute maximum bending moment.   |  |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>INFLUENCE LINES FOR INDETERMINATE BEAMS</b> |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Muller Breslau's principle– Influence line for Shearing force, Bending Moment and support reaction components of propped cantilever, continuous beams (Redundancy restricted to one).  |  |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>PLASTIC ANALYSIS</b>                        |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Plastic theory - Statically indeterminate structures – Plastic moment of resistance – Plastic modulus – Shape factor – Load factor – Plastic hinge and mechanism – collapse load - Static and kinematic methods – Upper and lower bound theorems - Plastic analysis of indeterminate beams and rigid frames. |  |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>ARCHES</b>                                  |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Arches - Types of arches – Analysis of three hinged and two hinged arches - Parabolic and circular arches – Settlement and temperature effects.  |  |  |                 |           |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>CABLES AND SUSPENSION BRIDGES</b>           |  |                 |           |  |                  |          |  | <b>9 + 3</b> |           |
| Components and their Functions - Analysis of cable under concentrated loads and UDL - Shape of cable under self-weight - Anchorage of suspension cables - Bending Moment and Shear Force in suspension bridges with three hinged stiffened girders.  |  |  |                 |           |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>                                      |  | <b>TUTORIAL</b> | <b>15</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>60</b> |

| Semester | Programme  | Course Code | Course Name                | L | T | P | C |
|----------|------------|-------------|----------------------------|---|---|---|---|
| VI       | B.E. CIVIL | 20CE6T2     | DESIGN OF STEEL STRUCTURES | 3 | 1 | 0 | 4 |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Design of structural steel connections.                     |  | K5        | 1              |
| CO2   | Design of tension members.                                  |  | K5        | 2              |
| CO3   | Design of compression members.                              |  | K5        | 3              |
| CO4   | Design of structural steel beam and plate girder.           |  | K5        | 4              |
| CO5   | Design of industrial building components and gantry girder. |  | K5        | 5              |

|                      |   |
|----------------------|---|
| <b>PRE-REQUISITE</b> | Mechanics of Solids–I, Mechanics of Solids–II |
|----------------------|---|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |

| Semester | Programme  | Course Code | Course Name                     | L | T | P | C |
|----------|------------|-------------|---------------------------------|---|---|---|---|
| VI       | B.E. CIVIL | 20CE6E1     | <b>PREFABRICATED STRUCTURES</b> | 3 | 0 | 0 | 3 |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| <b>CO1</b>  | Understand the design principles and stages of loading in precast construction.                     |  | K2        | 1              |
| <b>CO2</b>  | Understand about the panel systems, roof and floor slabs, shear walls.                              |  | K2        | 2              |
| <b>CO3</b>  | Analyse and Solve the problems in joint flexibility, joint deformation and disuniting of structures |  | K4        | 3              |
| <b>CO4</b>  | Understand the precast joint and connections, sealants.   |  | K2        | 4              |
| <b>CO5</b>  | Analyse the effect of abnormal loads in prefabricated structures.                                   |  | K4        | 5              |

|                      |                            |
|----------------------|----------------------------|
| <b>PRE-REQUISITE</b> | <b>CONCRETE TECHNOLOGY</b> |
|----------------------|----------------------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |
|--|-----------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|

| COURSE ASSESSMENT METHODS |   |   |
|---------------------------|---|---|
| <b>DIRECT</b>             | 1 | Continuous Assessment Tests               |
|                           | 2 | Other Assessments (Assignment, Quiz etc.) |
|                           | 3 | End Semester Examinations                 |
| <b>INDIRECT</b>           | 1 | Course Exit Survey                        |

| <b>COURSE CONTENT</b>  |                                     |  |                 |          |  |                  |          |  |              |           |
|--|-------------------------------------|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>PRINCIPLES OF PREFABRICATION</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Need for prefabrication – Principles of prefabrication – Modular coordination – Standardization – Materials – Systems – Production– Transportation – Erection.   |                                     |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>PREFABRICATED COMPONENTS</b>     |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Behaviour of structural components - Large panel constructions - Roof and floor slabs - Wall panels – Beams - Columns – Shear walls.   |                                     |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>DESIGN PRINCIPLES</b>            |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Design of cross section based on efficiency of material used - Problems in design because of joint flexibility – Allowance for joint deformation - Disuniting of structures.   |                                     |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>JOINTS AND CONNECTIONS</b>       |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Types of Joints - based on action of forces - compression joints - shear joints - tension joints - based on function - construction, contraction, expansion. Types of sealants - Types of structural connections - beam to column - column to column - beam to beam -column to foundation. |                                     |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>ABNORMAL LOADS</b>               |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Progressive collapse - Code provisions - Equivalent design loads for considering abnormal effects such as earthquakes, cyclones,etc., - Importance of avoidance of progressive collapse.   |                                     |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>                           |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Summarize the basics of waste management. |  | K2        | 1              |
| CO2   | Understand cleaner production.            |  | K2        | 2              |
| CO3   | Analyze elements of treatment technology. |  | K3        | 3              |
| CO4   | Apply pollution from industries.          |  | K4        | 4              |
| CO5   | Apply design of hazard waste.             |  | K3        | 5              |

#### COURSE LEARNING OUTCOMES (COs)

| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
|---|---|--|-----------|----------------|
| CO1   | Analyze and design the treatment units for various sources of water |  | K4        | 1              |
| CO2   | Design and prefer the various wastewater primary treatment units    |  | K5        | 2              |
| CO3   | Design and choose the various wastewater secondary treatment units. |  | K5        | 3              |
| CO4   | Understand the Plan and select the sludge disposal methods          |  | K2        | 4              |
| CO5   | Understand the wastewater disposal methods                          |  | K2        | 5              |

**STRATEGY:**

This course conceives purely a design problem in any one of the disciplines of Civil Engineering; e.g., Design of an RC & Steel structure, Design of a waste water treatment plant, Design of a foundation system, Design of traffic intersection, Design of bridges (ROB and RUB) and water tank etc. The design problem can be allotted to either an individual student or a group of students comprising of not more than four. At the end of the course the group should submit a complete report on the design problem consisting of the data given, the design calculations, specifications if any and complete set of drawings which follow the design.

|--|--|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>   | <b>DEWATERING</b>                                |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Introduction - Scope and necessity of ground Improvement in Geotechnical Engineering - Ground Water lowering by well points, deep wells, vacuum and electro- osmotic methods. Stabilization by thermal and freezing techniques - Applications.                                       |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>COMPACTION AND SAND DRAINS</b>                |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| In-situ compaction of granular and cohesive soils - Shallow and Deep compaction methods – Sand piles - factors influencing compaction. Blasting and dynamic consolidation - Preloading with sand grains - Theories of sand drain - relative merits of various methods.               |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>STONE COLUMN, LIME PILES AND SOIL NAILING</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Stone column, lime piles - Functions - methods of installation - design, estimation of load carrying capacity and settlement - Root piles and soil nailing - methods of installation - Design and applications - Soil liquefaction mitigation methods.                               |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>EARTH REINFORCEMENT</b>                       |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Earth reinforcement - Principles and basic mechanism of reinforced earth, simple design: Synthetic and natural fiber based geotextiles and their applications - Filtration, drainage, separation, erosion control - Electro-Chemical stabilization -Stabilization with cement, lime. |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>GROUTING</b>                                  |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Grouting - Types of grout - Suspension and solution grouts - Basic requirements of grout. Grouting equipment – injection methods - Jet grouting - grout monitoring.  |  |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>  |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| <b>Topic - 1</b>   | <b>INTRODUCTION TO ARCHITECTURE</b>           |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Fundamentals concepts of architecture – Principles of planning – Qualities, Strength, Refinement, Repose, Scale, Proportion, Colour, Solids and Voids and Symmetry.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>INTERIOR DECORATIONS</b>                   |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Interior Planning and treatment - Use of natural and synthetic building materials – Thermal and Acoustical materials - Lighting & illumination   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>PLANNING AND CONCEPTS OF TOWN PLANNING</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Planning Surveys - Importance of Climate topography, drainage and water supply in the selection of site for the development - Residential - Commercial – Industrial – Public – Transportation, Basic amenities and services.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>FUNCTIONAL PLANNING OF BUILDINGS</b>       |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Occupancy classification of buildings-general requirements of site and building – building codes and rules – licensing of building works. Functional planning of building such as residential, institutional, public, commercial, industrial buildings – the process of identifying activity areas and linkages. |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>COUNTRY PLANNING AND HOUSING</b>           |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Plan implementation: Town planning legislation and municipal acts – Planning control development schemes – Urban financing – Land acquisitions – Slum clearance schemes. Examples of planned cities and housing in India – Applications of Remote Sensing & GIS in town planning.                                |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>                                     |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| <b>Topic - 1</b>   | <b>INTRODUCTION TO HOUSING</b>                              |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Definition of Basic Terms – House, Home, Household, Apartments, Multi storied Buildings, Special Buildings, Objectives and Strategies of National Housing Policies including Slum Housing Policy, Principle of Sustainable Housing – Integrated approach on arriving holding capacity and density norms - All basic infrastructure consideration - Institutions for Housing at National, State and Local levels.   |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>   | <b>HOUSING PROGRAMMES</b>                                   |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Basic Concepts, Contents and Standards for Housing Programmes - Sites and Services, Neighborhoods- Plotted land development programs, Open Development Plots, Apartments, Gated communities, Townships, Rental Housing, Cooperative Housing, Slum Housing Programmes – Slum improvement – Slum redevelopment and Relocation – Use of GIS and MIS in Slum Housing Projects,, Role of Public housing agencies, and Private sector in supply , quality, infrastructure and pricing – Role of Non-Government Organizations in slum housing |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>   | <b>PLANNING AND DESIGN OF HOUSING PROJECTS</b>              |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Formulation of Housing Projects – Land Use and Soil suitability analysis -Building Byelaws and Rules and Development Control Regulations - Site Analysis, Layout Design, Design of Housing Units (Design Problems) – Housing Project Formulation.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>   | <b>CONSTRUCTION TECHNIQUES AND COST-EFFECTIVE MATERIALS</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| New Constructions Techniques – Cost Effective Modern Materials and methods of Construction- Green building concept- Building Centers – Concept, Functions and Performance Evaluation.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>   | <b>HOUSING FINANCE AND PROJECT APPRAISAL</b>                |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Evaluation of Housing Projects for sustainable principles – Housing Finance, Cost Recovery – Cash Flow Analysis, Subsidy and Cross Subsidy- Public Private Partnership Projects – Viability Gap Funding - Pricing of Housing Units (Problems).   |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>  | <b>45</b>   |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| Introduction to Smart Materials and Structures – Instrumented structures functions and response – Sensing systems – Self diagnosis – Signal processing consideration – Actuation systems and effectors.   |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>  | <b>MEASURING TECHNIQUES</b>                  |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Strain Measuring Techniques using Electrical strain gauges, Types – Resistance – Capacitance – Inductance – Wheatstone bridges – Pressure transducers – Load cells – Temperature Compensation – Strain Rosettes.  |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>  | <b>SENSORS</b>                               |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Sensing Technology – Types of Sensors – Physical Measurement using Piezo Electric Strain measurement – Inductively Read Transducers – The LVDT – Fiber optic Techniques. Chemical and Bio-Chemical sensing in structural Assessment – Absorptive chemical sensors – Spectroscopes – Fibre Optic Chemical Sensing Systems and Distributed measurement. |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>  | <b>ACTUATORS</b>                             |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Actuator Techniques – Actuator and actuator materials – Piezoelectric and Electrostrictive Material – Magnetostructure Material – Shape Memory Alloys – Electro rheological Fluids– Electro magnetic actuation – Role of actuators and Actuator Materials.  |  |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>  | <b>SIGNAL PROCESSING AND CONTROL SYSTEMS</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Data Acquisition and Processing – Signal Processing and Control for Smart Structures – Sensors as Geometrical Processors – Signal Processing – Control System – Linear and Non-Linear.  |  |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>   | <b>45</b>                                    |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Discuss the ethical issues related to engineering and realize the responsibilities and rights in the society.                 |  | K2        | 1              |
| CO2   | The student should be able to apply ethics in society.  |  | K3        | 2              |
| CO3   | Discuss the ethical issues related to Engineering.  |  | K3        | 3              |
| CO4   | Discuss the ethical issues related to Safety.   |  | K2        | 4              |
| CO5   | Analyze the human safety, responsibility and rights in hazardous environments and explain about ethics in the global context. |  | K3        | 5              |

|                      |            |

|---|---|-----------|
| After Successful completion of the course, the students should be able to |   | RBT Level |
| CO1   | State the aim and develop the procedure to conduct the experiment / exercise in the Computer Analysis and Design Laboratory.                                | K1        |
| CO2   | Demonstrate skills at the level of precision (reliably, quickly, smoothly, and accurately with negligible guidance) in performing the experiment / exercise | K3        |
| CO3   | Draw inferences from the experiment / exercise conducted and present it professionally  | K3        |
| CO4   | Demonstrate professionally the results obtained through the experiment / exercise and present conclusions   | K3        |
| CO5   | Demonstrate an understanding of the concepts, procedures, and applications through verbal and written communication   | K3        |
| CO6   | Demonstrating an attitude at the level of valuing (attaching values and expressing personal opinions by showing some definite involvement and commitment)   | K3        |

| VIII     | B.E. CIVIL | 20CE8L2     | INDUSTRIAL TRAINING | 4 Weeks |   |   | 2 |

| COURSE LEARNING OUTCOMES (COs)  |  |  |           |                |
|---|--|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |  |  | RBT Level | Topics Covered |
| CO1   | Identify the real world civil Engineering related problems.            |  | K2        | 1              |
| CO2   | Apply the theoretical concepts studied in the class rooms practically. |  | K3        | 1              |
| CO3   | The intricacies of implementation textbook knowledge into practice     |  | K2        | 1              |
| CO4   | The concepts of developments and implementation of new techniques      |  | K2        | 1              |
| CO5   | Identify the real world civil Engineering new ideas.                   |  | K2        | 1              |

|                      |            |
|----------------------|------------|
| <b>PRE-REQUISITE</b> | <b>NIL</b> |
|----------------------|------------|

| CO / PO MAPPING (1 – Weak, 2 – Medium, 3 – Strong) |                                   |     |     |     |     |     |     |     |     |      |      |      |      |      |
|--|-----------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| COs  | Programme Learning Outcomes (POs) |     |     |     |     |     |     |     |     |      |      |      | PSOs |      |
|  | PO1                               | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
| CO1  | 2                                 |     |     | 2   |     |     |     |     | 3   | 2    |      | 2    | 3    |      |

| <b>STRATEGY</b> |   |  |                 |          |  |                  |           |  |              |           |
|-----------------|---|--|-----------------|----------|--|------------------|-----------|--|--------------|-----------|
| 1               | Students have to undergo two-week practical training before the commencement of Eighth semester in Civil Engineering related organisations of their choice but with the approval of the department for the entire course. At the end of the training student will submit a report as per the prescribed format to the department. The student shall make a power point presentation before a committee constituted by the department which will assess the student based on the report submitted and the presentation made. |  |                 |          |  |                  |           |  |              |           |

|---|---|--|-----------------|----------|--|------------------|----------|--|--------------|-----------|
| <b>Topic - 1</b>  | <b>INTRODUCTION TO DISASTERS</b>                            |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc – Classification, Causes, Impacts including social, economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability – Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don'ts during various types of Disasters. |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 2</b>  | <b>APPROACHES TO DISASTER RISK REDUCTION (DRR)</b>          |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Disaster cycle – Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders- Institutional Processes and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies.                                  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 3</b>  | <b>INTER RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT</b> |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India – Relevance of indigenous knowledge, appropriate technology and local resources.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 4</b>  | <b>DISASTER RISK MANAGEMENT IN INDIA</b>                    |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, and Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy – Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment                                 |   |  |                 |          |  |                  |          |  |              |           |
| <b>Topic - 5</b>  | <b>DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES</b>   |  |                 |          |  |                  |          |  | <b>9</b>     |           |
| Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.  |   |  |                 |          |  |                  |          |  |              |           |
| <b>THEORY</b>   | <b>45</b>   |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |  | <b>TOTAL</b> | <b>45</b> |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Students will appreciate the role of environment in the current practice of agriculture and concerns of sustainability, especially in the context of climate change and emerging global issues. |  | K1        | 1              |
| CO2   | Ecological context of agriculture and its concerns will be understood   |  | K4        | 2              |
| CO3   | Students must be able to identify climate changes.  |  | K4        | 3              |
| CO4   | Students must be able to identify ecological diversity.   |  | K4        | 4              |
| CO5   | Students must be able to identify emerging issues   |  | K4        | 5              |

|                      |     |

| COURSE LEARNING OUTCOMES (COs)  |   |  |           |                |
|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Identify the chemical compositions of natural waters,   |  | K2        | 1              |
| CO2   | Identify the main sources of water pollution, the main types of pollutant and how each type may be controlled.                            |  | K2        | 2              |
| CO3   | Outline the extent of water pollution in the selected global location.  |  | K2        | 3              |
| CO4   | Identify the criteria for drinking water acceptability in the EU, and outline the processes used to treat water for a public water supply |  | K3        | 4              |
| CO5   | Outline how sewage may be treated before discharge to the environment   |  | K2        | 5              |

|---|---|--|-----------|----------------|
| After Successful completion of the course, the students should be able to |   |  | RBT Level | Topics Covered |
| CO1   | Understand the physical and mechanical properties of various construction materials |  | K2        | 1              |
| CO2   | Understand the properties of various miscellaneous materials                        |  | K2        | 2              |
| CO3   | Understand the construction technique to be followed in brick masonry               |  | K2        | 3              |
| CO4   | Understand the construction technique to be followed in stone masonry               |  | K2        | 4              |
| CO5   | Understand the various types of foundations.  |  | K2        | 5              |

| <b>Topic - 1</b>  | <b>PLANNING OF BUILDING</b>        |  |                 |          |  |                  |          | <b>9</b> |              |           |
| Principles of planning, Relevant building bylaws, site selection for buildings, orientation of buildings, common errors in planning                         |                                    |  |                 |          |  |                  |          |          |              |           |
| <b>Topic - 2</b>  | <b>GREEN BUILDING TECHNOLOGIES</b> |  |                 |          |  |                  |          | <b>9</b> |              |           |
| Introduction- Necessity - Concept of Green building. Principles of green building   |                                    |  |                 |          |  |                  |          |          |              |           |
| <b>Topic - 3</b>  | <b>RAIN WATER HARVESTING</b>       |  |                 |          |  |                  |          | <b>9</b> |              |           |
| Introduction- Necessity - Provision of rain water harvesting  |                                    |  |                 |          |  |                  |          |          |              |           |
| <b>Topic - 4</b>  | <b>ENERGY EFFICIENCY</b>           |  |                 |          |  |                  |          | <b>9</b> |              |           |
| Environmental impact of building constructions, Concepts of embodied energy, operational energy and life cycle energy. Methods to reduce operational energy |                                    |  |                 |          |  |                  |          |          |              |           |
| <b>Topic - 5</b>  | <b>BUILDING MATERIALS</b>          |  |                 |          |  |                  |          | <b>9</b> |              |           |
| Methods to reduce embodied energy in building materials: Use of natural and renewable materials like bamboo, timber, rammed earth, stabilized mud blocks.   |                                    |  |                 |          |  |                  |          |          |              |           |
| <b>THEORY</b>   | <b>45</b>                          |  | <b>TUTORIAL</b> | <b>0</b> |  | <b>PRACTICAL</b> | <b>0</b> |          | <b>TOTAL</b> | <b>45</b> |
